chapters on modern data analytic methods Each chapter includes exercises data sets and applications to supplement learning Modern Statistics A Computer Based Approach with Python is intended for a one or two semester advanced undergraduate or graduate course Because of the foundational nature of the text it can be combined with any program requiring data analysis in its curriculum such as courses on data science industrial statistics physical and social sciences and engineering Researchers practitioners and data scientists will also find it to be a useful resource with the numerous applications and case studies that are included A second closely related textbook is titled Industrial Statistics A Computer Based Approach with Python It covers topics such as statistical process control including multivariate methods the design of experiments including computer experiments and reliability methods including Bayesian reliability These texts can be used independently or for consecutive courses The mistat Python package can be accessed at <https://github.com/mistat> code solutions

ModernStatistics In this book on Modern Statistics the last two chapters on modern analytic methods contain what is very popular at the moment especially in Machine Learning such as classifiers clustering methods and text analytics But I also appreciate the previous chapters since I believe that people using machine learning methods should be aware that they rely heavily on statistical ones I very much appreciate the many worked out cases based on the longstanding experience of the authors They are very useful to better understand and then apply the methods presented in the book The use of Python corresponds to the best programming experience nowadays For all these reasons I think the book has also a brilliant and impactful future and I commend the authors for that Professor Fabrizio Ruggeri Research Director at the National Research Council Italy President of the International Society for Business and Industrial Statistics ISBIS Editor in Chief of Applied Stochastic Models in Business and Industry ASMBI
