We choose to go to the moon in this decade and do the other things not because they are easy but because they are hard because that goal will serve to organize and measure the best of our energies and skills because that challenge is one that we are willing to accept one we are unwilling to postpone and one which we intend to win John F Kennedy We need to get this back to the labs before we can run any real tests Taylor ran off from the screen yelling I'm sending you pictures and my findings so far The crew of the Phoenix VII are the first humans to set foot on Mars and yet this was insignificant compared to their true mission to search the Gorgon crater On their way back home to Earth a solar flare hits the ship sending the Phoenix VII out into space The crew crash lands and finds themselves fighting for their lives The Phoenix VII faces aliens elements nature and a deadly threat they brought with them from Mars Their only goal To get back

home to settle the debate about life outside Earth once and for all The last two days all Taylor could think about was the bacteria they recovered from Mars If what Sophie said was true and he had no reason to doubt her then the bacteria was adapting rapidly Will they manage to succeed when the unpredictability of the universe sets in *Avernus* Book One is the start of this unique science fiction world which will appeal to fans of Kim Stanley Robinson's *Aurora* and Andy Weir's *The Martian* The focus on science and biology will fascinate fans of David Brin's *Uplift* War series I don't think the human race will survive the next thousand years unless we spread into space There are too many accidents that can befall life on a single planet But I'm an optimist We will reach out to the stars
