

The purpose of this report is to evaluate the efficiency of the economic course which I completed. It is based on my personal experience, which I received while taking part in the aforementioned course.

General Findings

The course as a whole was very engaging and helpful. As it took place in the economical environment, many aspects of the economy, which will not be taught at school, could be learned through this course.

Points worthy of praise

The course has found many businesses, with which they cooperate, therefore I took away some insights from different companies by listening to many subject matter experts. There is nothing better than learning from business experts who are managing their own companies. I learned a substantial amount of methods and specific strategies to that field, which makes the course very useful, should you manage to increase the revenue in your company, coping with a subject it can increase your knowledge.

Issues

No issues can be raised about the work part of the course. However, some theoretical classes that take place in the morning offer no substantial benefit over practical classes taken in the afternoon, even if they are taught with some real use cases.

Suggestions

I would recommend to everyone this course if the organizer of the course could increase the amount of practical sessions that is spent working during the course and reduce the amount of theoretical classes taken. Moreover the organizer should keep finding more companies with which to cooperate, to make the course attractive to more students with different interests.
