informational reading standards of the Common Core State Standards for English Language Arts for grades 3-12 and of the Common Core State Standards for Literacy in History/Social Studies/Science and Technical Subjects. *Learning from the Learners* Elizabeth Berry, Bettina J. Huber, Cynthia Z. Rawitch, 2017-12-15 This book turns the traditional approach to student success on its head by examining the learning habits of successful students based on what they have told us about their learning strategies on what they do to succeed in college and on the teaching practices they think best foster their learning. This approach is in stark contrast to most recent studies of learning at the college level which focus on what students need to do to succeed but are written from the point of view of experts who provide advice to struggling students. *Learning from the Learners: Successful College Students Share Their Effective Learning Habits* is based on what expert students tell us about what they as learners do to succeed. It is grounded in a 10-year study that rests on a rich qualitative data set that includes open-ended survey responses gathered on a term-by-term basis and in-depth interviews during the freshman and junior years with over 700 students of diverse backgrounds. Additionally, since many students interviewed were the first in their family to attend college and from backgrounds traditionally underserved by higher education, the book's insights will be of particular interest to educators elsewhere who are increasingly expected to help similar students succeed. Themes include student success, academic challenges, diversity, pedagogy, and technology in the classroom. No other book on the widely discussed subject of student success relies on such a wealth of quantitative and qualitative data about what works from the point of view of students themselves.

An Evidence-based Guide to College and University Teaching Aaron S. Richmond, Guy A. Boysen, Regan A. R. Gurung, 2016-06-10 What makes a good college teacher? This book provides an evidence-based answer to that question by presenting a set of model teaching characteristics that define what makes a good college teacher. Based on six fundamental areas of teaching competency known as Model Teaching Characteristics outlined by The Society for the Teaching of Psychology (STP), this book describes how college faculty from all disciplines and at all levels of experience can use these characteristics to evaluate, guide, and improve their teaching. Evidence-based research supports the inclusion of each characteristic, each of which is illustrated through example to help readers master the skills. Readers learn to evaluate their teaching abilities by providing guidance on what to document and how to accumulate and organize the evidence. Two introductory chapters outline the model teaching characteristics, followed by six chapters each devoted to one of the characteristics: training, instructional methods, course content, assessment, syllabus construction, and student evaluations. The book features in each chapter self-evaluation surveys that help readers identify gaps between the model characteristics and their own teaching, case studies that illustrate common teaching problems, discussion questions that encourage critical thinking, and additional readings for further exploration. Discusses the need to master teaching skills such as collaborative learning, listening, and using technology, as well as discipline-specific knowledge. Advocates for the use of student learning outcomes to help teachers better evaluate student performance based on their achievement of specific learning goals. Argues

for the development of learning objectives that reflect the core of the discipline's theories and applications strengthen basic liberal arts skills and infuse ethical and diversity issues Discusses how to solicit student feedback and utilize these evaluations to improve teaching Intended for professional development or teacher training courses offered in masters and doctoral programs in colleges and universities this book is also an invaluable resource for faculty development centers college and university administrators and college teachers of all levels and disciplines from novice to the most experienced interested in becoming more effective teachers Teaching Community College and Historically Underserved Students Melissa Dennihy, Zivah Perel Katz, 2024-11-15 This textbook develops and presents a new hybrid pedagogy that integrates the best practices of both face to face and online teaching within community colleges and other access oriented institutions Focusing specifically on historically underserved students this text demonstrates how online pedagogy offers new and different approaches to learning engaging collaborating and communicating which can also be adapted for face to face classrooms creating an innovative blended pedagogy that builds upon both course experiences Recognizing that higher education is at a unique turning point as the Covid 19 pandemic and its effects become endemic this volume offers educators ways to forge new paths forward and prepare for future crises by learning how to maximize the possibilities of both face to face and online learning tools and approaches
