Guide to College Writing Assessment Peggy O'Neill, Cindy Moore, Brian Huot, 2009-04-15 While most English professionals feel comfortable with language and literacy theories assessment theories seem more alien English professionals often don t have a clear understanding of the key concepts in educational measurement such as validity and reliability nor do they understand the statistical formulas associated with psychometrics But understanding assessment theory and applying it by those who are not psychometricians

is critical in developing useful ethical assessments in college writing programs and in interpreting and using assessment results. A Guide to College Writing Assessment is designed as an introduction and source book for WPAs, department chairs, teachers, and administrators. Always cognizant of the critical components of particular teaching contexts, O'Neill, Moore, and Huot have written sophisticated but accessible chapters on the history, theory, application, and background of writing assessment, and they offer a dozen appendices of practical samples and models for a range of common assessment needs. Because there are numerous resources available to assist faculty in assessing the writing of individual students in particular classrooms, A Guide to College Writing Assessment focuses on approaches to the kinds of assessment that typically happen outside of individual classrooms: placement evaluation, exit examination, programmatic assessment, and faculty evaluation. Most of all, the argument of this book is that creating the conditions for meaningful college writing assessment hinges not only on understanding the history and theories informing assessment practice but also on composition programs availing themselves of the full range of available assessment practices.

Lexical Errors and Accuracy in Foreign Language

Writing María Pilar Agustín Llach, 2011. This book explores how lexical competence develops in a foreign language and also argues for the importance of lexical accuracy as a measure of the quality of foreign language writing and as an indicator of receptive vocabulary knowledge.

Using Digital Portfolios to Develop Students' Writing Ricky Lam, Benjamin Luke Moorhouse, 2022-11-07. This book equips pre-service teachers, research postgraduate students, teacher educators, and language specialists with specific knowledge and skills about the principles, research, and applications of digital portfolios within the EFL writing contexts. While most digital portfolio scholarship focuses on higher education, this book targets primary level and secondary level school audiences, namely pre-service teachers, teacher educators, and Ministry of Education staff members, with a focus on EFL writing. The rationale behind this design is that the published literature on digital portfolios tends to be generic and one-size-fits-all; there has been scant published scholarship about the development of digital portfolio literacy among teachers and pupils, which could enable them to upgrade the teaching and learning of writing in a larger EFL environment. This volume fills this gap by illustrating the why, what, and how aspects of digital portfolios in ten reader-friendly chapters. Guiding educators to enrich their pedagogical repertoire via the portfolio approach, this book emphasises a healthy balance between principles, research, and practice. It is an easy-to-follow guide to setting up digital portfolio systems and coaching pupils to improve writing, ensuring the dissemination of digital portfolios with high fidelity.
