shift has paved the way for the integration of newly conceived didactic resources such as the mediation of social networks for learning language or the interdisciplinarity of culturally mediated language education. It is crucial to understand this shift in order to ensure students receive the best education possible. *New Approaches to the Investigation of Language Teaching and Literature* presents an overview of the ongoing methodological tools, practices, research designs and strategies used in language and literature teaching and provides education researchers and practitioners with empirically sustained evidence of teaching strategies that may be implemented in language education. Covering key topics such as language skills, adult learners, digital literacy and learning aids, this reference work is ideal for researchers, scholars, academicians, practitioners, educators and students.

Changing Practices for the L2 Writing Classroom Nigel A. Caplan, Ann Johns, 2019-04-26
This volume was written to make the case for changes in second language writing practices away from the five paragraph essay and toward purposeful, meaningful writing instruction. As the volume editors say, "If you have already rejected the five paragraph essay, we offer validation and classroom tested alternatives. If you are new to teaching L2 writing, we introduce critical issues you will need to consider as you plan your lessons and as you consider, review the textbooks and handbooks that continue to promote the teaching of the five paragraph essay. If you need ammunition to present to colleagues and administrators, we present theory, research and pedagogy that will benefit students from elementary to graduate school. If you are skeptical about our claims, we invite you to review the research presented here and consider what your students could do beyond writing a five paragraph essay if you enacted these changes in practice." Part 1 discusses what the five paragraph essay is, and it is not a very old, established form of writing; it is not a genre and it is not universal. Part 2 looks at writing practices to show the essay's ineffectiveness in elementary schools, secondary schools, first year writing classes, university writing courses, undergraduate discipline courses and graduate school. Part 3 looks beyond the classroom at testing. At the end of each chapter, the authors, all well known in the field of second language writing, suggest changes to teaching practices based on their theoretical approach and classroom experience. The book closes by reviewing some of the major questions raised in the book by exploring which questions have been left unanswered and by offering suggestions for teachers who want to move away from the five paragraph essay. An assignment sequence for genre aware writing instruction is included.

Developing Creative Thinking to Improve Academic Writing Azza Abugharsa PhD, 2018-05-08
Developing Creative Thinking to Improve Academic Writing Part Two: Advanced Level textbook helps enhance lateral thinking within the given contextual frame in order to promote students' intellectual challenge to produce a comprehensive understanding about the topic. This facilitates flexible thinking required to write academic assignments in which arguments are presented for thorough analysis. Since rigid judgments can lead to fossilized views, it is recommended to emphasize the concept that all opinions are correct from the points of view of their holders. In this regard, this book helps college students practice improving their triangular thinking skills which emphasize evaluation of all the aspects of the topic in an equal pattern.

Furthermore this book is useful for ESL college students as well as native speakers of English as it reinforces transformational learning principles which highlight education by inspiration rather than information Such a strategy can motivate the students to become more creative more practical and more resourceful and enable them to transform their learning related thinking abilities and attitudes in order to come to a better understanding of themselves and the world
