Vision Based Autonomous Robot Navigation Amitava Chatterjee,Anjan Rakshit,N. Nirmal Singh,2012-10-13 This monograph is devoted to the theory and development of autonomous navigation of mobile

robots using computer vision based sensing mechanism The conventional robot navigation systems utilizing traditional sensors like ultrasonic IR GPS laser sensors etc suffer several drawbacks related to either the physical limitations of the sensor or incur high cost Vision sensing has emerged as a popular alternative where cameras can be used to reduce the overall cost maintaining high degree of intelligence flexibility and robustness This book includes a detailed description of several new approaches for real life vision based autonomous navigation algorithms and SLAM It presents the concept of how subgoal based goal driven navigation can be carried out using vision sensing The development concept of vision based robots for path line tracking using fuzzy logic is presented as well as how a low cost robot can be indigenously developed in the laboratory with microcontroller based sensor systems The book describes successful implementation of integration of low cost external peripherals with off the shelf procured robots An important highlight of the book is that it presents a detailed step by step sample demonstration of how vision based navigation modules can be actually implemented in real life under 32 bit Windows environment The book also discusses the concept of implementing vision based SLAM employing a two camera based system

Reading the Bible Ethically Eric J. Douglass, 2014-09-11 All interpretive systems deal with the author Modern systems consider the text to be autonomous so that it is disconnected from the author's interests In *Reading the Bible Ethically* Eric Douglass reconsiders this connection His central argument is that the author is a subject who reproduces her culture and her subjectivity in the text As the author reproduces her subjectivity the text functions as the author's voice This allows Douglass to apply ethical principles to interpretation where that voice is treated as a subject for conversation and not an object for manipulation He uses this to texture the reading process so that an initial reading takes account of the author's communication while a second reading critiques that communication **Data Privacy Management and Autonomous Spontaneous Security** Joaquin Garcia-Alfaro, Guillermo Navarro-Arribas, Nora Cuppens-Boulahia, Sabrina De Capitani di Vimercati, 2012-03-12 This book constitutes the thoroughly refereed joint post proceedings of two international workshops the 6th International Workshop on Data Privacy Management DPM 2011 and the 4th International Workshop on Autonomous and Spontaneous Security SETOP 2011 held in Leuven Belgium in September 2011 The volume contains 9 full papers and 1 short paper from the DPM workshop and 9 full papers and 2 short papers from the SETOP workshop as well as the keynote paper The contributions from DPM cover topics from location privacy privacy based metering and billing record linkage policy based privacy application of data privacy in recommendation systems privacy considerations in user profiles in RFID in network monitoring in transactions protocols in usage control and in customer data The topics of the SETOP contributions are access control policy derivation requirements engineering verification of service oriented architectures query and data privacy policy delegation and service orchestration **The Rotting Goddess** Jacob Rabinowitz, 1998 Literary Nonfiction

Canadian Books in Print. Author and Title Index, 1975 **Non-Territorial Autonomy and Decentralization** Tove H. Malloy, Levente Salat, 2020-10-15 This volume describes and analyzes alternative and emerging models of non territorial autonomy NTA particularly in relation to decentralization The authors push the NTA debate in new directions by offering a re

conceptualization based on ethno cultural bottom up decentralized action that redefines autonomy into its true sense of autonomous action Through description critical analysis and evaluation of several case studies this book assesses the potential for new paradigms within decentralized systems The authors explore two approaches to political decentralization which add to the theoretical debate on NTA network governance which focuses on new dynamics in policy processes and normative pluralism which focuses on accommodating the distinctness of the groups through the subsidiarity principle with regard to their own affairs The book explores the potential ramifications of ethno cultural NTA institutions acting within the wider framework of state institutions and assesses the functions of these institutions as another dimension of decentralization and thus another layer of democracy With contemporary examples from Europe the Middle East Asia and South Africa as well as theoretical aspects of the conceptualization of autonomy this book offers a truly global perspective It will be of great interest to policy makers in countries experiencing adverse developments due to the pressure on public management as well as advanced students and scholars questioning the ability of the Westphalian system to address cultural diversity
