Replacing the AA Battery of the Keyboard

Change the AA battery in the keyboard when the battery power becomes low.

1. Set the power switch of the keyboard to **OFF**.

2. Turn over the keyboard, and then push the center of the cover in the direction shown in the illustration below.

3. Remove the old battery and insert a new AA alkaline battery (minus (-) end first), then close the cover.

4. Set the power switch of the keyboard to **ON**.

Note

- Use a new AA alkaline replacement battery.
- If you do not intend to use the keyboard for a while, set the power switch of the keyboard to **OFF**. If you do not intend to use the keyboard for an extended period of time, remove its AA battery.
- When the battery power becomes low, replace with a new AA battery promptly. Keeping a depleted battery in the keyboard may cause battery leakage.
- Since the keyboard cannot be used with a commercially available rechargeable battery, use a non-rechargeable AA battery. If you use a rechargeable battery, battery leakage may occur, resulting in a malfunction.
- Do not recharge a dry cell AA battery.
- Refer to the supplied safety information manual.
