Unlike most of the key players in the wireless arena, i mode eschews the Wireless Application Protocol WAP and uses a simplified version of HTML Compact Wireless Markup Language CWML instead of WAP's Wireless Markup Language WML. Ever since its introduction in February 1999, i mode has been the most successful mobile internet technology of the World. It is the quickness by which the technology has spread over Japan. In Japan, the number of i mode users is close to a sensational 13 million. This means that 10% of Japan's total population are using i mode after not even 2 years of its existence. As a progression from his first book i mode Strategy, the author describes how i mode has evolved. He focuses on the i mode ecosystem, the metaphor he uses to describe such a self-developing business from concept to reality. The effect of i mode, the evolution of Cell phones, partnerships with real businesses such as the collaboration with Coca Cola in Japan, the struggle for dominance in the net business and the globalisation of the i mode business arena from a Japanese only ecosystem to the global arena. The author is the most highly respected expert in this field. The i mode Wireless Ecosystem is a must for everyone wanting to know more about NTT DoCoMo and how it has sustained its business model. Discusses the globalisation of i mode featuring the key points such as origin, development, international expansion and the

role of partners etc Through using his own company s strategy and experience the author explains the value of creating a business ecosystem and the benefits of co operation between various mobile operators Highlights the reasons for i mode s success in Japan and extrapolates these to future directions A valuable addition to the bookshelf of all Mobile operators especially those directly involved with Marketing Product Development and 3G Content providers working within Product Development Business Development Marketing and Mobile Services and consultants bankers and media professionals keen to gain an insight into this dynamic field
