Television & Cable Factbook ,2001 Consuming Environments Mike Budd,Steve Craig,Clayton M. Steinman,1999 This is an exploration of how much TV people watch why they watch too much and what they see The authors argue that while people may have good reasons for watching television they seem to be unaware that such habits might be harmful to their environmental health The book examines how advertising and media companies have shaped the commercial content of most television tracing industry motives and operations and their increasing concentration in fewer hands *Commercial Culture* Leo Bogart,2017-09-29 American mass media are the world s most diverse rich and free Their dazzling resources variety and influence arouse envy in other countries Their failures are commonly excused on the grounds that they are creatures of the market that they give people what they want Commercial Culture focuses not on the glories of the media but on what is wrong with them and why and how they may be made better This powerful critique of American mass communication highlights four trends that sound an urgent call for reform the blurring of distinctions among traditional media and between individual and mass communication the increasing concentration of media control in a disturbingly small number of powerful organizations the shift from advertisers to consumers as the source of media revenues and the growing confusion of information and entertainment of the real and the imaginary The future direction of the media Leo Bogart contends should not be left to market forces alone He shows how the public s appetite for media differs from other demands the market is left to satisfy because of how profoundly the media shape the public s character and values Bogart concludes that a world of new communications technology requires a coherent national media policy respectful of the American tradition of free expression and subject to vigorous public scrutiny and debate Commercial Culture is a comprehensive analysis of the media as they evolve in a technological age It will appeal to general readers interested in mass communications as well as professionals and scholars studying American mass media **Television Violence** United States. Congress. Senate. Committee on Commerce, Science, and Transportation,1996 *Other Voices* Everette Dennis,2017-07-05 Conflicting journalistic voices that were raised in the past have become such a jumble that merely

identifying them is difficult Dennis and Rivers define categorize present and examine the voices that contributed to what became known as the new media environment in the 1970s This new journalism came about as a result of dissatisfaction with existing values and standards of the early 1960s style of journalism The authors are comprehensive in their concerns as reflected in the national scope presented They cover developments in the major cities on both coasts in the Middle West and South in every major region of the United States Most of the research required travel and interviews all of it required reading almost endlessly and watching the video productions of journalists who built the structure of alternative television Dennis and Rivers offer a representative view of forms and media as well as the people who fashioned the new orientation The authors claim that the wrangling over objective and interpretative reporting misses the main point which is that neither is in close touch with reality The best objective report may cover all surfaces of an event the best interpretative report may explain all its meanings but both are bloodless a world away from the experience Color flavor atmosphere the ultimate human meaning all these the new journalists contend are far beyond the reach of traditional models of journalism This is one of the central reasons for the emergence of different forms and practices in our time This volume will help younger scholars understand the sources of quasi journalistic practices extant today including blogging and electronic only publications
