Charging the battery

Your phone battery is partly charged when you buy the phone. It may take a few minutes before the battery icon  appears on the screen when you connect the phone charger cable to a power source, such as a USB port or a phone charger. You can still use your phone while it is charging.

The battery will start to discharge a little after it is fully charged and then charges again after a certain time. This is to extend battery life and may result in the charge status showing a level below 100 percent.
