Lexical Availability in English and Spanish as a Second Language Rosa María Jiménez Catalán,2013-09-06 This volume contributes to the research in two different research areas lexical availability studies and vocabulary research in second or foreign languages Lexical availability is defined as the words that immediately come to mind as a response to a stimulus provided by topics related to domains closely connected to daily life for instance animals food and drink daily activities politics or poverty Lexical availability is a dimension of learners receptive and productive lexical competence and consequently an important variable of learners communicative competence Written by leading researchers in Spanish and English applied linguistics the studies presented in this volume offer the reader findings and insights from studies conducted in learners with different mother tongues who learn English or Spanish as their second or third language This book made me aware of an approach to vocabulary acquisition which has a long tradition in European research but has been somewhat neglected by English speaking researchers The methodology was pioneered in France where it developed into the Francais Fondamental project an influential approach to the vocabulary needs of learners of French It was also taken up by Spanish researchers and more recently developed by the team at La Rioja University Where English language research has focused on the frequency of words in large corpora and the implications of this feature for L2 vocabulary acquisition the lexical availability tradition takes a much more learner centred approach to L2 vocabulary skills directly reflecting learners needs and learners ability to do things with small effective vocabularies This leads to a set of research priorities that look refreshingly different from the ones we are used to Read this book It might change the way you think about vocabulary research Paul Meara Swansea University Wales UK **The Young Scientist** Herman F. Nathenson,Euan S. Henderson,2018-02-06 The use of self instructional learning materials presented through a wide range of media was becoming an increasingly pervasive and important part of the educational scene at all levels from infant school to university Much had been written both theoretical and practical about various aspects of the techniques for developing such materials However one phase of the development process while generally recognised to be critical in producing materials of high quality and educational effectiveness had been relatively neglected in the literature This is the phase of trying out the materials in draft form on students collecting feedback and undertaking revision in the light of the ensuing data Based on considerable practical experience this book originally published in 1980 examines the planning and executing of the collection of feedback from students on self instructional learning materials concerned with various subject

matters and presented through various media both printed and audio visual A brief survey of the development of materials based learning is provided in order to set the use of student feedback in context and to sort out some of the terminology in common use The main part of the book illustrates a step by step method through all the stages of the try out process from initial planning of the project to final revision of the materials Thus a particular approach to the process of trying out draft materials is advocated which is outlined by means of a case study Finally there is an examination of whether using student feedback to revise learning materials can actually improve their educational quality and effectiveness with particular reference to the approach described earlier Incorporating a full bibliography this study combines a comprehensive review of what is known about this crucial phase of developing learning materials with an original how to do it guide for practitioners which has itself been subject to extensive try out **The Everything Learning Spanish Book, 3rd Edition** Julie
