grammar nominal and verbal inflectional morphology subject and object pronouns complex structures involving movement topicalizations questions relative clauses and aspects of verb meaning that have consequences for syntax The book argues that Universal Grammar constrains all instances of language acquisition and that there is a fundamental continuity between monolingual bilingual child and adult early grammatical systems While stressing their similarities with respect to linguistic representations and processes the book also considers important differences between these three acquisition situations with respect to the outcome of acquisition It is also shown that many linguistic properties of Spanish are acquired earlier than in English and other languages This book is a must read for those interested in the acquisition of Spanish from different theoretical perspectives as well as those working on the acquisition of other languages in different contexts **School**
