Fuzzy Language in Literature and Translation Lu SHAO, 2023-06-16 Bringing a fuzzy logic based approach into translation studies and drawing on the theory of information entropy this book discusses the translation of fuzzy language in literary works and advances a new method of measuring text fuzziness between translation and source text Based on illustrative examples from the popular novel The Da Vinci Code and its two translated Chinese versions the study demonstrates the fuzziness measuring method through an algorithmic process More specifically information entropy is applied to measure the uncertainty associated with readers understanding of the original and its corresponding target texts The underlying hypothesis is that the probability distribution in which readers will understand identified fuzzy discourse is measurable By further explicating the validity of the hypothesis it seeks to solve translational fuzzy problems in the translation process and offers an alternative novel approach to the study of fuzzy literary texts and their translation Hopefully the argument of the book that the intrinsic uncertainty of fuzzy language can be evaluated through Shannon s information entropy will open up a new avenue to the quantitative description of the fuzziness of language and translation This book will be of interest to scholars and students in translation studies applied linguistics and literary criticism **A Stumble on the Threshold** James Payn, 1893 **Morning Telegraph's Racing Chart Book**, 1912 **South of South Beach** Keith G.
