Interactive IR User Study Design, Evaluation, and Reporting Jiqun Liu, Chirag Shah, 2022-05-31 Since user study design has been widely applied in search interactions and information retrieval IR systems evaluation studies a deep reflection and meta evaluation of interactive IR IIR user studies is critical for sharpening the instruments of IIR research and improving the reliability and validity of the conclusions drawn from IIR user studies To this end we developed a faceted framework for supporting user study design reporting and evaluation based on a systematic review of the state of the art IIR research papers recently published in several top IR venues n 462 Within the framework we identify three major types of research focuses extract and summarize facet values from specific cases and highlight the under reported user study components which may significantly affect the results of research Then we employ the faceted framework in evaluating a series of IIR user studies against their respective research questions and explain the roles and impacts of the underlying connections and collaborations among different facet values

Through bridging diverse combinations of facet values with the study design decisions made for addressing research problems the faceted framework can shed light on IIR user study design reporting and evaluation practices and help students and young researchers design and assess their own studies

Critical Thinking and the Academic Study of Religion Richard Penaskovic, 1997 Originally Published by Scholars Press Now Available from Duke University Press This work responds to a renewed emphasis on teaching in the academy Written from the perspective of a classroom teacher it is a practical application of the principles behind the critical thinking movement to the study of religion Emphasizing that the acquisition of critical thinking depends less on what is taught than on how it is taught the author presents concrete examples from his own experience to illustrate a student centered approach to teaching By demonstrating how the study of religion contributes to the development of critical thinking through the acquisition of problem solving decision making and metacognitive skills Penaskovic suggests its value to a broader liberal arts curriculum as well Both a theoretical view of critical thinking and a nuts and bolts manual on how it can be used and assessed in the classroom this work will challenge new and veteran teachers alike to reexamine and renew what they do in the classroom
