STUDYING PEDIGREES ACTIVITY

Introduction: A pedigree is a visual chart that depicts a family history or the transmission of a specific trait. They can be interesting to view and can be important tools in determining patterns of inheritance of specific traits. Pedigrees are used primarily by genetic counselors when helping couples decide to have children when there is evidence of a genetically inherited disorder in one or both families. They are also used when trying to determine the predisposition of someone to carry a hereditary disease for example, familial breast cancer.

Sequences are used to indicate marks in a facility:

Triangles are used to indicate formulas.

If the individual is "affected" by the trait (dominant or recessive) we define the shape:

A line between a male and a female indicates a marriage or union.

A line drawn down from the marriage line indicates offspring.

Sometimes, you will see some shapes filled in only **half** way. - this notation indicates a **hybrid** (heterozygous) or **carrier** of the trait
