Air travel and health Great Britain: Parliament: House of Lords: Science and Technology Committee, Lord Broers, 2007-12-12 This report is a follow up to an earlier report published in 2000 HLP 121 I session 1999 2000 ISBN 9780104442005 on air travel and health That report acted as a stimulus to further research into the health of air crew and passengers and led to a broader examination of such issues The report also led to the setting up of the Aviation Health Working Group in 2001 and later the Aviation Health Unit in 2003 within the Civil Aviation Authority CAA which acts as a focal point for aviation health in the UK In this report the Committee sets out the current situation and still finds issues that remain of concern particularly the risk to air travellers of venous thromboembolism VTE A WHO study is to examine VTE risk for individuals with existing risk factors and the Committee urges the Government to continue to support this project The Committee also believes that further investigation into the effects of fumes on pilots and others should be continued The Committee has set out a number of recommendations including that jet lag should be studied

as a confounding effect of DVT that the Government should explore ways to increase the research capacity in aviation health that the CAA should implement the recommendations of its own research into aircraft seating standards and increase the minimum seat pitch to at least 28 2 inches the Government should also review the level of air passenger duty levied on premium economy seating also that the Government and airlines advise passengers on the proven benefits of good hygiene in the reduction of disease transmission and that as part of their contingency plans airlines that are flying from areas affected by a pandemic should provide bacterial wipes to passengers that the Government and the AHU work together with airlines and others in providing consistent air travel advice to passengers on the risks associated with self medicating with the intention of preventing DVT

Against the backdrop of enormous technological strides this book argues that the air transport industry must be constantly vigilant in its efforts to employ a legal regime that is applicable to the aeronautical and human aspects of the carriage by air of persons and goods In this regard safety and security are of the utmost importance both in terms of safe air navigation and the preservation of human life Although the International Civil Aviation Organization ICAO addresses legal issues through its Legal Committee many emerging issues that urgently require attention lie outside the Committee s purview This book analyzes in detail the items being considered by ICAO s Legal Committee considers the legal nature of ICAO and discusses whether or not ICAO s scope should be extended Since the limited issues currently addressed by ICAO do not reflect the rapidly changing realities of air transport the book also covers a broad range of key issues outside the parameters set by ICAO such as the need to teach air law to a new generation of aviation professionals combating cyber crime and cyber terrorism the regulation of artificial intelligence traveller identification interference with air navigation human trafficking unruly passengers climate change air carrier liability for passenger death or injury Remotely Piloted Aircraft Systems drones and the cabin crew and their legal implications The SAGE International Encyclopedia of Travel and Tourism Linda L.
