U. S. Air Force Survival Handbook United States Air Force, 2012-01. A comprehensive manual of proven wilderness survival tactics for every situation. Written for use in formal United States Air Force survival training courses, the U. S. Air Force Survival Handbook is the bible for pilots who want to stay alive no matter what. Assuming as the Air Force does that flight personnel may be faced at any time with a bailout or crash landing in hostile territory without supplies, the advice here is superlatively practical but also surprisingly readable and interesting. Detailing specific survival threats at sea, in the tropics, in the desert, in Arctic conditions, and the psychological perils of imprisonment and torture, this handbook is replete with fascinating and useful, if unsettling, information. Precisely written, profusely illustrated, and completely authoritative, this is an essential book for anyone, soldier or civilian, looking for knowledge that could prove to be the difference between life and death in a dangerous situation. 1000 black and white illustrations.

Survival United States Air Force, 2020-10-09. This classic 1956 edition of the US Air Force Survival manual will be enjoyable reading for anyone interested in the Cold War survival and the wilderness or American cultural history. Viewers who enjoy movies like *Dr. Strangelove*, *Fail Safe*, and *Strategic Air Command* will find this a fascinating look into the mindset of the era's aviators. Survival under adverse conditions ranging up to hot war was a very real concern. Dozens of US aircraft were shot down during the Cold War. From the Foreword by General Nathan Twining: This Manual is designed for use of students in the Air Force survival training courses. It amplifies AFM 64-5 Survival by including training information not covered in the kit edition because of weight and size of limitations. AFM 64-3 can also be used as a source book of survival information. It includes much detailed information which would have been beyond the intended scope of the smaller publication; it tells the reader not only what he must do but also why he must do it. Because of the global responsibilities of the United States Air Force, all Air Force personnel face the possibility of survival in a remote or desolate area of the world. It is the purpose of this Manual to prepare all personnel participating in flights on military aircraft for an intelligent approach to any possible survival situation. The reader is shown that nature and the elements are neither friendly nor hostile, and that the training and attitude he carries with him will determine his success in survival. The Manual opens with a discussion of the problems and techniques of general land survival: psychological problems, immediate action, camping, and woodcraft travel.
