Smit, Bernd Sures, 2025-06-16. This open access volume is the first to provide a comprehensive overview of the ecological and environmental characteristics of marine and freshwater parasites. In three clearly organized sections, world leading authors present the current state of our knowledge as well as the future trends for their respective fields in aquatic parasitology. First, the basic life cycle strategies of the various major groups of aquatic parasites are presented, including protists, myxozoa, aquatic fungi, helminths, and arthropods. Subsequent chapters explore the ecological implications of aquatic parasites, covering topics such as biodiversity, evolution, community structures, behavior, and conservation, to name a few. In addition, important developments in research are presented, such as the use of different molecular tools and eDNA in aquatic parasitology. The final section is devoted to the new field of environmental parasitology, where readers will find contributions on biological markers, invasive species, and bioindicators of environmental pollution, among others. Due attention is also given to zoonoses, aquaculture, and the effects of climate change on aquatic parasites. All chapters include original, high-quality illustrations and never-before-seen photographs which complement the diverse aspects of aquatic parasitology described. Thus, this book is a must for every parasitologist and ecologist. *Scaffolding work-integrated learning excursions* Adri Du

Toit, Neal Petersen, Iman C. Chahine, 2025-02-28. In South Africa, work-integrated learning (WIL) excursions are crucial in preparing university students for the world of work. As higher education institutions (HEIs) evolve to promote equity and inclusivity, these excursions are continuously refined to enhance student learning outcomes. This scholarly book explores how WIL excursions support self-directed learning (SDL) and foster skills essential for the 21st century, such as active learning, intercultural sensitivity, and epistemological access. A key focus is on the 2023 WIL excursions at North West University (NWU), which align with South Africa's National Development Plan 2030 and the University Capacity Development Grant's (UCDG) goal of equipping graduates to address contemporary societal challenges. The book examines first-year excursions across three faculties: Education, Health Sciences, and Law, using both virtual and in-person experiences to develop intercultural citizenship, communication, and a sense of belonging. Through research-based insights, the chapters highlight how these

excursions were designed and implemented to help students recognise personal biases deepen cultural awareness and take responsibility for their own learning Additionally the book underscores how students were encouraged to identify their learning needs and access resources that promote ongoing self directed growth By linking WIL to SDL the book provides novel perspectives on fostering inclusivity and preparing students for their academic journeys professional careers and contributions to a more socially just world
