Acaricides Resistance in Ticks Sachin Kumar, Raquel Cossio-Bayúgar, Estefan Miranda-Miranda, Anil Kumar Sharma, Ashok Kumar Chaubey, 2025-02-25 This book discusses the significance of the chemical acaricides resistance in ticks as a global problem. Resistance is the ability of a tick population to survive and reproduce in the presence of a pesticide that would otherwise be lethal. This resistance threatens the efficacy of a range of acaricides used to control tick populations and consequently has a negative impact on the effectiveness of various pest management strategies. This resistance is caused by the selection of resistant tick genotypes and enhanced metabolic detoxification. To address this problem, the book explores an integrated approach that is needed to identify and manage tick populations that are resistant to acaricides as well as identify and develop novel acaricides that are effective against resistant tick species populations. It describes the complex issues associated with this phenomenon using cutting edge advancement in Bioinformatics and Bioinformation Discovery. The chapters provide current information pertaining to the types of protein protein complexes homodimers heterodimers multimer complexes in context with various specific and sensitive biological functions. The significance of such complex formation in human biology in the light of molecular evolution is also highlighted using several examples. The book serves as a valuable resource for students academicians and researchers studying about tick resistance. **SADC Gender Protocol**

Wolhuter, 2019-12-12 The focus of this publication is on answering the central research question How can Human Rights be advanced with regard to different kinds of diversities and in different educational settings The publication pays special attention to the advancement of human rights in a variety of education related contexts in keeping with human rights as a declared national priority for both society at large and the education system One strategic priority of the Faculty of Education is research based on market requirements and needs This book strives towards meeting this expectation by directly aiming at building human rights and social justice in the South African society public schools and higher education institutions Adjudication in the education context of the constitutional values of dignity equality and freedom focusses regularly on learners The book highlights the value of education for full fledged citizenship by delineating what schooling should entail to inspire learners towards both claiming equal freedoms and rights and taking accountability for the responsibilities attached to citizenship The Role of Architects in Informal Settlements Nastaran Sedehi, Seyed Hossein Iradj Moeini, 2024-10-17 With over one billion people worldwide living in informal settlements and enduring substandard housing conditions these areas present one of the greatest urban challenges of our time The existence of informal settlements is deeply intertwined with global issues such as climate change war induced displacement and colonialism As sustainability becomes a central focus in various disciplines including architecture the path to sustainable urban development lies in addressing the problems of informal settlements Architecture s relevance to this discourse is paradoxically highlighted by its perceived irrelevance Informal settlements are often overlooked as legitimate sites for architectural practice This neglect stems from two assumptions first architecture s traditional dependence on power and capital isolating the marginalised who rarely have the chance to receive architectural services and second architecture s perceived incapability to address urban scale infrastructural problems and thereby its reduction to aesthetic creativity and form making This book challenges architecture s focus on the centre and its lack of ambition for creating a pervasive impact on cities Instead it highlights the profession s potential to serve the common good and address urban scale infrastructural issues and proposes the effective engagement of architects in informal settlements Drawing on Henri Lefebvre s dichotomy of margin versus centre in urban spaces informal settlements are interpreted as spaces on the city s periphery created by the marginalised with limited access to power capital and authority By revisiting interrelated concepts such as the production of space the right to the city social architecture and spatial agency within the

context of informal settlements the book claims a space for architectural practice in these areas It incorporates discussions on insurgent citizenship and critiques of the self help approach contextualising its arguments with architectural intervention precedents from around the world The book concludes with a brief manifesto on practising architecture in informal settlements The book aspires to inspire architecture students practitioners and researchers to explore the profession s potential in social problem solving and to push the boundaries of practice towards inclusiveness for all urban inhabitants
