Mojekwu, Wellington Thwala, Clinton Aigbavboa, Emmanuel Bamfo-Agyei, Lawrence Atepor, Rexford Assasie Oppong, 2022-01-01 This book presents papers from the 10th Applied Research Conference in Africa ARCA showcasing the latest research on education and inclusive safe resilient and sustainable communities The conference is focused on applied research discussion and its dissemination developing understanding about the role of research and researchers in the development of the continent Education is a key driver to transform lives build peace eradicate poverty and drive sustainable development in Africa Researchers face large challenges to making a meaningful contribution to the development of Africa It is a continent where research can at time be not viewed directly related to development The aim of the Applied Research Conference in Africa is to provide a platform for capacity building and networking among researchers in Africa The proceedings is focussed on applied research its discussion and dissemination and will be of interest to researchers professors graduate students policymakers and professionals in industry Research Universities in Africa Nico Cloete, Ian

Bunting, 2018-11-09 From the early 2000s a new discourse emerged in Africa and the international donor community that higher education was important for development in Africa Within this zeitgeist of converging interests a range of agencies agreed that a different collaborative approach to linking higher education to development was necessary This led to the establishment of the Higher Education Research and Advocacy Network in Africa Herana to concentrate on research and

advocacy about the possible role and contribution of universities to development in Africa This book is the final publication to emerge from the Herana project The project has also published more than 100 articles chapters reports manuals and datasets and many presentations have been delivered to share insights gained from the work done by Herana Given its prolific dissemination it seems reasonable to ask whether this fourth and final publication will offer the reader anything new This book is certainly different from previous publications in several respects First it is the only book to include an analysis of eight African universities based on the full 15 years of empirical data collected by the project Second previous books and reports were published mid project This book has benefited from an extended gestation period allowing the authors and contributors to reflect on the project without the distractions associated with managing and participating in a large scale project For the first time some of those who have been involved in Herana since its inception have had the opportunity to at least make an attempt to see part of the wood for the trees Different does not necessarily mean new An emphasis on the newness of the data and perspectives presented in this book is important because it shows that it is more than a historical record of a donor funded project Rather each chapter in this book brings to a lesser or greater extent something new to our understanding of universities research and development in Africa

Cohabitation among Students in Higher-Learning Institutions in Tanzania Elia Shabani Mligo, Jael Omanga Otieno, 2018-02-28 Colleges and universities have been meeting places of students for the sake of studies all over the world As students transcend from secondary level education to tertiary level the degree of freedom increases they become free to live the style of life they choose This freedom is mainly caused by their advance in age from childhood to youth ages Cohabitation is one of the styles of life that students in most higher learning institutions choose to live However cohabitation is not the style of life that emerges in the recent time In the industrialized world for example cohabitation among youth started a long time ago By the 1970s and 1980s its rate increased greatly due to secularization and increase in freedom Being aware of this growing trend in cohabitation this book surveys the extent of cohabitation among students in higher learning institutions in Tanzania and how it affects the academic performance of the cohabiting partners It means that the book assesses both positive and negative effects for this style of life among the surveyed students Therefore this book is important to both university and college students so that they can be aware of the positive and negative effects of cohabitation especially in terms of academic performance

Enabling legal frameworks for sustainable land-use investments in Tanzania: Legal assessment report Robert Kibugi, D. Andrew Wardell, Marie-Claire Cordonier Segger, Caroline Haywood, Renée Gift, 2015-10-08 The International Development Law Organization IDLO and the Center for International Forestry Research CIFOR assessed the legal frameworks that govern land use activities and investments in Tanzania The policy institutional and legal frameworks are well developed although implementation and enforcement remains weak due to ambiguities in the law and a general lack of supportive incentives This Legal Assessment report for Tanzania examines four key challenges to the attainment of sustainable land use investments

These comprise Enforcement of environmental and social safeguards Tanzania has made progress in implementing the Environmental Management Act by ensuring greater compliance with the Environmental Impact Assessment regulations although exceptions exist in the construction sector and mining legislation that often enables the government to circumvent important land tenure safeguards Incentives for sustainable investments in the legal framework A lack of incentives exists despite the creation of the Tanzania Investment Centre the adoption of an Investment Guide in 2013 and the incorporation of sustainability considerations into laws and policies governing investments in the agriculture energy and forestry and mining sectors Land tenure security Tanzania's land law framework now includes formal recognition of customary title and the reservation of land under the category of village land exclusively for Tanzanians although improvements are still needed in terms of processes of consultation and compensation Public awareness and lack of access to information Awareness of natural resources and investment policies legislation and regulations is generally low amongst rural communities as well as Ward executive officers village leaders and village land committee members Rural radio represents their most important source of information

Varieties of Capitalism in History, Transition and Emergence Martha Prevezer, 2017-03-27 Economics tends to teach that developed countries have good institutions while developing countries do not and that this is the factor that constrains the latter's growth However the picture is far messier than this explanation suggests Building on the varieties of capitalism framework this book brings together the tools of institutional economics with historical analyses of institutional evolution of different kinds of property rights and legal systems protected by different kinds of state giving rise to distinct corporate governance structures It constructs institutional development histories across leading liberal capitalisms in Britain and the United States compared

with continental capitalisms in France and Germany and contemporary transitional capitalisms in China and Tanzania This volume is innovative in combining both historical and economic insights and in combining developed country with developing country institutional emergence dispelling the prevailing sense of complacency about the inevitability of the path of institutional development for the developed areas of the world and the paths that developing countries are likely to follow This volume will be of great importance to those who study international economics development economics and international business

The Delusion of Knowledge Transfer Susanne Koch, Peter Weingart, 2016-12-13 With the rise of the knowledge for development paradigm expert advice has become a prime instrument of foreign aid At the same time it has been object of repeated criticism the chronic failure of technical assistance a notion under which advice is commonly subsumed has been documented in a host of studies Nonetheless international organisations continue to send advisors promising to increase the effectiveness of expert support if their technocratic recommendations

are taken up This book reveals fundamental problems of expert advice in the context of aid that concern issues of power and legitimacy rather than merely flaws of implementation Based on empirical evidence from South Africa and Tanzania the authors show that aid related advisory processes are inevitably obstructed by colliding interests political pressures and hierarchical relations that impede knowledge transfer and mutual learning As a result recipient governments find themselves caught in a perpetual cycle of dependency continuously advised by experts who convey the shifting paradigms and agendas of their respective donor governments For young democracies the persistent presence of external actors is hazardous ultimately it poses a threat to the legitimacy of their governments if their policy making becomes more responsive to foreign demands than to the preferences and needs of their citizens
