Brown,2023-08-21

When high magnitude meteorological hazards impact vulnerable human populations disasters are the inevitable consequence Through archaeological and historical evidence this book investigates how these sudden and unpredictable events affected British medieval populations AD 1000 1500 Medieval society understood disasters in a practical sense and took steps to minimise risk by constructing flood defences and reinforcing structures damaged by storms At the same time natural hazards were widely interpreted through a framework of religious and superstitious beliefs and a wide variety of measures were followed to secure protection against the dangers of the natural world Disasters therefore were interpreted through a duality of understanding in which their occurrence could be the result of spiritual or superstitious triggers but practical solutions were a key component in mitigating their tangible impacts In evaluating this duality this book focuses on specific case studies and considers both their diverse historical contexts as well as their consequences for society against the backdrop of significant demographic and climatic change as a result of the Black Death and the transition to the Little Ice Age *The International Journal of Indian Psychology, Volume 4, Issue 2, No. 87* IJIP.In,2017-02-23 **Knowledge Socialism** Michael A. Cottrell, 2024-12-05 In response to the upheavals engendered by World War II revolutions broke out or loomed throughout the world Nationalist aspirations proved global in nature ironically empowered by the Cold War In Asia the Middle East Latin America and Africa revolutions and counterrevolutions proliferated and similar disruptions threatened to unfold in Europe and North America Social upheavals began to occur in Vietnam Mandatory Palestine China

Algeria Ghana and Cuba Conservative and reactionary forces frequently pushed back quashing hopeful developments like the Guatemalan Spring the Hungarian Revolution and the Prague Spring while also readily resorting to the murder of leading progressive figures from Gandhi to Navalny The second volume of this detailed history explores the rippling effects of World War II across the globe including countries experiencing colonial or neocolonial relationships This book examines the interplay between modern revolutionary movements and campaigns seeking to prevent such movements or to reestablish a history and time that never really existed It also traces the deadly resort to politically motivated killings which cut short the lives of so many distinguished sometimes beloved figures whose loss is still felt decades later

Media Practices and Changing African Socialities Jo Helle-Valle, Ardis Storm-Mathisen, 2020-03-01 Deriving from innovative new work by six researchers this book questions what the new media's role is in contemporary Africa The chapters are diverse covering different areas of sociality in different countries but they unite in their methodological and analytical foundation The focus is on media related practices which require engagement with different perspectives and concerns while situating these in a wider analytical context The contributions to this collection provide fresh ethnographic descriptions of how new media practices can affect socialities in significant but unpredictable ways
