Deliberation in South Africa Sarah Chiumbu, Gilbert Motsathebe, 2021-05-24 This book critically analyses the important role of radio in public life in post apartheid South Africa As the most widespread and popular form of communication in the country radio occupies an essential space in the deliberation and the construction of public opinion in South Africa From just a few state controlled stations during the apartheid era there are now more than 100 radio stations reaching vast swathes of the population and providing an important space for citizens to air their views and take part in significant socio economic and political issues of the country The various contributors to this book demonstrate that whilst print and television media often serve elite interests and audiences the low cost and flexibility of radio has helped it to create a common space for national dialogue and deliberation The book also investigates the ways in which digital technologies have enhanced the consumption of radio and produced a sense of imagined community for citizens including those in marginalised communities and rural areas This book will be of interest to researchers with an interest in media politics and culture in South Africa specifically as well as those with an interest in broadcast media more generally *The Modernist World* Allana Lindgren, Stephen

Ross, 2015-06-05 The Modernist World is an accessible yet cutting edge volume which redraws the boundaries and connections among interdisciplinary and transnational modernisms The 61 new essays address literature visual arts theatre dance architecture music film and intellectual currents The book also examines modernist histories and practices around the globe including East and Southeast Asia South Asia Sub Saharan Africa Australia and Oceania Europe Latin America the Middle East and the Arab World as well as the United States and Canada A detailed introduction provides an overview of the scholarly terrain and highlights different themes and concerns that emerge in the volume The Modernist World is essential reading for those new to the subject as well as more advanced scholars in the area offering clear introductions alongside new and refreshing insights Contemporary Philosophical Proposals for the University Aaron Stoller, Eli Kramer, 2018-02-12

This edited collection brings together a robust range of philosophers who offer theoretically and critically informed proposals regarding the aims policies and structures of the university The collection fills a major gap in the landscape of higher education theory and practice while concurrently reviving a long and often forgotten discourse within the discipline of philosophy It includes philosophers from across the globe representing disparate philosophical schools as well as various

career stages statuses and standpoints within the university There is also a diversity in method approach and style which varies from personal narratives and case studies to philosophical genealogies to traditional philosophical essays and to systematic theories The collection can serve as a theoretical resource for critically minded administrators and faculty who wish to analyze and change policies and structures at their home institutions It will introduce them to a wide range of possible educational imaginaries as well as provide them with productive suggestions for pragmatic change on campuses

States of exclusion Nicolaas Buitendag, 2023-03-01 The theoretical underpinnings of public international law have taken the sovereign status of the nation state for granted since the beginning of the modern era After centuries of evolution in legal and political thought the state's definition as a bounded territorial unit has been strictly codified The legal development of the nation state was an ideological project informed by extra legal considerations Additionally the ever narrowing scope of the juridical idea of sovereignty functioned as a boundary mechanism instrumental in colonising Africa and other regions While international law claims universal liberalism today the current system based on sovereign nation states represents not social inclusion but fierce and dangerous exclusion The central thesis of this book is that the development of legal sovereignty was rather than part of the modernist progress narrative a historically contingent evolutionary regression While other social systems such as economics and science became globalised politics and law counterintuitively became more territorialised It is argued that the nation state today is not only anachronistic but is dangerously ill equipped for facing international problems such as the climate crisis or global pandemics Finally it also leaves African states and many other formerly colonised territories at a particular disadvantage by regulating their political practices into a predefined mould

Wyk and Jimmy Pieterse interrogate the question of political subjectivity and its role in the making of anthropology and anthropologists by revisiting the pitched battles between so called liberal social anthropologists and conservative nationalist volkekundiges in South Africa They pay particular attention to the social and cultural lives of two men who were central proponents of South African anthropology s two tales Kees van der Waal a former volkekundige and John Sharp once one of volkekunde s fiercest critics Through a series of conversations with Kees and John they show that the issues that once divided a local field still animate the ways in which centres and peripheries of global anthropology relate to one another and to foundational questions about the discipline s epistemology and political positionality
