*Student Movements in Late Neoliberalism* Lorenzo Cini, Donatella della Porta, César Guzmán-Concha, 2021-08-22 This book inquires into the global wave of student mobilizations that have arisen in the aftermath of the economic crisis of 2008 accounting for their historical and sociological significance More specifically its eleven chapters explore the role of students as political actors their ability to build effective organizations to make political alliances with other actors and to win public consensus as well as their impact on cultural political and policy outcomes To do so the volume examines case studies in England Chile South Africa Quebec and Hong Kong covering Europe Africa Asia and North and Latin America Grouped into two major sections the collection covers the organizational structures of student movements and their alliances and outcomes Ultimately this volume examines the understudied political aspects of student unrest exploring how student mobilizations driven by indebtedness precariousness the corporatization of the university and other issues correspond to larger processes of change with wider implications in society

*The Politics of Truth and Reconciliation in South Africa* Richard Wilson, 2001-05-02 The South African Truth and Reconciliation Commission TRC was set up to deal with the human rights violations of apartheid during the years 1960 1994 However as Wilson shows the TRC's restorative justice approach to healing the nation did not always serve the needs of communities at a local level Based on extended anthropological fieldwork this book illustrates the impact of the TRC in urban African communities in Johannesburg While a religious constituency largely embraced the commission's religious redemptive language of reconciliation Wilson argues that the TRC had little effect on popular ideas of justice as retribution This provocative study deepens our understanding of post apartheid South Africa and the use of human rights discourse It ends on a call for more cautious and realistic expectations about what human rights institutions can achieve in democratizing countries

*Southern Resistance in Critical Perspective* Marcel Paret, Carin Runciman, Luke Sinwell, 2017-03-27 From the Arab Uprising to anti austerity protests in Europe and the US Occupy Movement to uprisings in Brazil and Turkey resistance from below is flourishing Whereas analysts have tended to look North in their analysis of the recent global protest wave this volume develops a Southern perspective through a deep engagement with the case of South Africa which has experienced widespread popular resistance for more than a decade Combining critical theoretical perspectives with extensive qualitative fieldwork and rich case studies Southern Resistance in Critical Perspective situates South Africa's contentious democracy in relation to both the economic insecurity of contemporary global capitalism and the constantly shifting political terrain of post apartheid nationalism The analysis integrates worker community and political party organizing into a broader narrative of resistance bridging historical divisions between social movement studies labor studies and political sociology

*Historical Dictionary of South Africa* Christopher Saunders, Peter Limb, 2020-12-15 As the most influential and powerful country on the entire continent of Africa an understanding of South Africa's past and its present trends is crucial in appreciating where South Africans are going to

and from where they have come South Africa changed dramatically in 1994 when apartheid was dismantled and it became a democratic state Since 2000 when the previous edition appeared further big changes occurred with the rise of new political leaders and of a new black middle class There were also serious problems in governance in public health and the economy but with a remarkable popular resilience too This third edition of Historical Dictionary of South Africa contains a chronology an introduction and an extensive bibliography The dictionary section has more than 600 cross referenced entries on important personalities as well as aspects of the country's politics economy foreign relations religion and culture This book is an excellent resource for students researchers and anyone wanting to know more about South Africa      **Global**

Tempelhoff, 2018-12-01 Geologists physicists and ecologists currently promote the idea of a post Holocene epoch the Anthropocene As a result of constant innovation and modernisation in the fields of engineering natural science management studies and environmental studies there has been a growing awareness of the intrinsic interaction between humankind and the environment Humankind has become part of the environmental dynamics to the extent that they are literally able to change ecosystems Nowhere is the impact more evident than in the anthropogenic engagement with the hydrosphere from the smallest pool of water to the earth's atmosphere Comprehensive infrastructure development in water and sanitation the growing trend to seek additional resources in the form of groundwater desalinated seawater and recycled wastewater as well as special attention being given to capturing and preserving rainwater bear evidence of a timely response to climate change population growth and rapid development in many water stressed regions of the world The purpose of the book is to provide a historical overview of the manner in which South Africa's water resources have been governed from a

time when the Union of South Africa was formed in 1910 up to 2008 a time of a growing global awareness of the potential impact that climate change may have on water resources in a key region of southern Africa notable for increasing levels of aridity and more erratic rainfall patterns This focus on the history of water affairs in South Africa makes it possible for scholars to comprehend the contemporary transitions made in the country's water governance system since the establishment in 2014 of the Department of Water and Sanitation The focus is on the Water Energy Food nexus a strategy which holistically contemplates the governance and use of water from the perspective of the interconnection between water energy and food as resources
