Students with Disabilities and the Transition to Work Oliver Mutanga, 2019-07-01 This book sets out to understand how students with disabilities experience higher education and the transition to the workplace. It foregrounds the voices of students and graduates in order to explore identity, inclusion, participation and success of youth with disabilities in higher education as well as their transition from university to employment. The author proposes a new understanding of disability considered in terms of a continuum of abilities, balancing empirical data, theory and policy analysis with specific regard to the interests of youth with disabilities, making a unique contribution to discussions on access, inclusion and success in higher education and employment. These discussions inform social development and educational policy planning and implementation not only in South Africa but also in countries with a similar context, particularly in terms of remedial courses of action that bring social justice to people with disabilities. *Students with Disabilities and the Transition to Work* will be of interest to all scholars and students working in the fields of disability studies, particularly those with a focus on critical disability studies and disability in the global south as well as those working in higher education, sociology, development studies and social policy.

The Formation of Intellectual Capital and Its Ability to Transform Higher Education Institutions and the Knowledge Society Cardoso Espinosa, Edgar Oliver, 2019-06-28 The knowledge society arises from the combination of four interdependent elements: the production of knowledge through research, its transmission through education, its dissemination through information and communication technologies, and its exploitation through innovation. For this reason, higher education institutions (HEIs) are the main component of the formation of intellectual capital because they are the key element of the knowledge society, so it is necessary that they continue to be the main source of the necessary skills that allow the increase of economic competitiveness, sustainability and citizen welfare within the framework of quality education and equity. *The Formation of Intellectual Capital and Its Ability to Transform Higher Education Institutions and the Knowledge Society* is an essential research publication that provides systemic research on the formation of intellectual capital in higher education and its impact on the knowledge society. Highlighting topics such as educational programs, management strategy and educational studies, this book is meant for educators, educational technologists, students, researchers, professionals and administrators.

It is one of the outcomes of the Second World Symposium on Sustainability Science, which was jointly organised by the Pontifícia Universidade Católica do Paraná.

Measurement Methodologies to Assess the Effectiveness of Global Online Learning Isaias, Pedro,Issa, Tomayess,Kommers, Piet,2022-02-18 While online learning was an existing practice the COVID 19 pandemic greatly

accelerated its capabilities and forced educational organizations to swiftly introduce online learning for all units. Though schools will not always be faced with forced online learning, it is apparent that there are clear advantages and disadvantages to this teaching method with its usage in the future cemented. As such, it is imperative that methods for measuring and assessing the effectiveness of online and blended learning are examined in order to improve outcomes and future practices.

Measurement Methodologies to Assess the Effectiveness of Global Online Learning aims to assess the effectiveness of online teaching and learning in normal and pandemic situations by addressing challenges and opportunities of adoption of online platforms as well as effective learning strategies, investigating the best pedagogical practices in digital learning, questioning how to improve student motivation and performance, and managing and measuring academic workloads online. Covering a wide range of topics such as the future of education and digital literacy, it is ideal for teachers, instructional designers, curriculum developers, educational software developers, academics, researchers, and students.

Culture and Rural-Urban Revitalisation in South Africa Mziwoxolo Sirayi, Modimowabarwa Kanyane, Giulio Verdini, 2021-06-14. This book captures ground-breaking attempts to utilise culture in territorial development and regeneration processes in the context of South Africa and our new normal brought by COVID-19, the fourth industrial revolution, and climate change. The importance of culture in rural urban revitalisation has been underestimated in South Africa and the African continent at large. Despite some cultural initiatives that are still at developmental stages in big cities such as Johannesburg, eThekweni, and Cape Town, there is concern about the absence of sustainable policies and plans to support culture, creativity, and indigenous knowledge at national and municipal levels. Showcasing alternative strategies for making culture central to development, this book discusses opportunities to shift culture and indigenous knowledge from the peripheries and place them at the epicentre of sustainable development and the mainstream of cultural planning, which can then be applied in the contexts of Africa and the Global South. Governmental institutions, research councils, civil society organisations, private sector, and higher education institutions come together in a joint effort to explain the nexus between culture, economic development, rural urban linkages, grassroots, and technological innovations. **Culture and Rural Urban Revitalization in South Africa** is an ideal read for those
