The Science of Basic L-Rod Dowsing Richard Warburton, 2025-02-14 Dowsing has been a known practice for at least 500 years with some evidence suggesting it may have been used for millennia Historically dowsers used a forked Y shaped stick following the movement toward the presence of water minerals or other objects located beneath the ground Today the most common tool used is a wire bent into the shape of an L leading to the term L rod dowsing Only a few of dowsing's many forms appear to have a clear physical basis such that some physical phenomenon in the environment causes a physiological response in the body Despite the many studies performed in the past none have resulted in a comprehensive testable explanation for how dowsing works This book reviews and critiques some of the common explanations for L rod field dowsing describes an investigation into various aspects of L rod dowsing and proposes a mechanism which explains the physical observations Building on the prior scientific studies it presents a theory based on well known scientific principles for the physical component of dowsing

Martin, Len Unsworth, 2023-08-07 This innovative volume provides a new analytic framework for understanding how meaning making resources are deployed in images designed for knowledge building in school science The framework enables analyses of science images from the perspectives of both their complexity and recognizability Complexity deals with the technical and abstract knowledge of school science technicality evaluative dispositions in relation to that knowledge iconization and the condensation of the technical and dispositional meanings as synoptic eye-fuls in discipline specific infographics aggregation

Recognizability concerns the relationship between the appearance of phenomena in reality and the reconfiguration of this reality in images congruence the perceptibility or discernibility of the features and contexts of phenomena in images explicitness and how images engage their viewers affiliation The framework is illustrated by more than 100 images in colour in the e book and black and white in the paper version and will inform research into multimodal literacy pedagogy that incorporates an understanding of the role of images in the teaching and learning of school science This book will be of particular interest to scholars in multimodality semiotics literacy education and science education
