Higher Education Admission Practices María Elena Oliveri, Cathy Wendler, 2020-01-30 Reveals practices and issues in higher education admissions which are critical factors for improving worldwide access and equity Between Mission and Market Daniel Rosenberg, 2017-04-26

Between Mission and Market The Freshman Year in a Corporate Age focuses on the arrival of college freshmen at the moment of the transformation it uses Adelphi University in suburban New York City to study an attempt to resolve first year difficulties As higher education institutions turn into enterprises run on business models the pressures of getting into college including the taking of the SAT and ACT have induced stress addictions eating disorders drug use and mental problems However special programs to ease the first year transition through counseling and support are run as cheaply as possible This book confronts some of the cardinal controversies in higher education particularly those affecting first year students high stakes testing in general particularly the SAT the intensification of student debt and the financial sentence imposed upon all who incur it and the dramatic pressures placed upon freshmen as they transition to college

The Status of Student Involvement in University Governance in Kenya Mulinge, Munyae M., Arasa, Josephine N., 2017-05-05 This book examines the concept of the democratization of governance in universities in Kenya with particular emphasis on students involvement in governance processes and decision making Data were collected from members of the student community utilizing a structured self administered questionnaire and from purposively selected key informants and focus group discussants drawn from Kenyatta University representing the public sector and the United States International University representing the private sector The guiding argument for the study was that shared governance one of the principles of good governance is critical in enabling the universities to deliver their visions and the missions effectively The results revealed that while in principle Kenyan universities have embraced democratic governance in which all stakeholders including students have a role to play in practice they continue to violate the core principles of good governance particularly shared governance Specifically students who are major stakeholders in university education are largely excluded from significant structures of governance thereby limiting their influence and participation Although their representation is mainly provided via student self governance organs unions associations and or councils their effectiveness is undermined considerably by the lack of trust and confidence of the student body and the unending manipulation by top university administrators and external political actors Student active involvement in decision making is mainly confined to lower levels such as the school faculty and departmental programme The authors call for a paradigm shift in the involvement of students in the governance of universities in ways that discourage the current culture of tokenism and political correctness that characterizes public and private universities in Kenya

Thus Until Emilia Ilieva, Reuben Matheka, 2025-08-04 Thus Until A History of Egerton University is a thorough historical chronological and well researched

account of Egerton University from a whites only college when it started in 1939 through to the expansion it has experienced over the years culminating in being a full university More than any other university in Kenya Egerton has a long and colourful history but like all the other universities it has suffered from the political economic and financial challenges of the time especially since the double intake of the 1990s Chapter One provides the required background to the study highlighting agricultural and educational policies and steering away from the Happy Valley hype so characteristic of the period The reader will learn about the Egerton family in Chapter Two and particularly about Lord Egerton himself and the colonial circumstances within which he lived The chapter dispels some of the popularly held myths about him Chapter Three deals with the beginnings of the college and the various structural and curriculum experiments tried out and the kind of enrolment and students it experimented with as an all white establishment The chapter ends with Africans beginning to agitate for change With great attention to detail the later chapters put the university in a broader local and international context thereby increasing its relevance to society A History of Egerton University though heavily footnoted and with a detailed bibliography is written in a simple easy flowing and accessible style

Making College Work Harry J. Holzer, Sandy Baum, 2017-08-15 Practical solutions for improving higher education opportunities for disadvantaged students Too many disadvantaged college students in America do not complete their coursework or receive any college credential while others earn degrees or certificates with little labor market value Large numbers of these students also struggle to pay for college and some incur debts that they have difficulty repaying The authors provide a new review of the causes of these problems and offer promising policy solutions The circumstances affecting disadvantaged students stem both from issues on the individual side such as weak academic preparation and financial pressures and from institutional failures Low income students disproportionately attend schools that are underfunded and have weak performance incentives contributing to unsatisfactory outcomes for many students Some solutions including better financial aid or academic supports target individual students Other solutions such as stronger linkages between coursework and the labor market and more structured paths through the curriculum are aimed at institutional reforms All students and particularly those from disadvantaged backgrounds also need better and varied pathways both to college and directly to the job market beginning in high school We can improve college outcomes but must also acknowledge that we must make hard choices and face difficult tradeoffs in the process While no single policy is guaranteed to greatly improve college and career outcomes implementing a number of evidence based policies and programs together has the potential to improve these outcomes substantially

The Right to Education in India Florian Matthey-Prakash, 2019-08-22 What does it mean for education to be a fundamental right and how may children benefit from it Surprisingly even when the right to education was added to the Indian Constitution as Article 21A this question barely received any attention The book identifies justiciability or more broadly enforceability as the most important feature of Article 21A meaning that children and their parents must be provided with means to effectively

claim their right from the State otherwise it would remain a right only on paper The book highlights how lack of access to the Indian judiciary means that the constitutional promise of justiciability remains unfulfilled It deals with the possible alternative means the State may provide for the poor to claim the benefits under Article 21A and identifies the grievance redress mechanism created by the Right of Children to Free and Compulsory Education Act 2009 as a potential system of enforcement Even though this system is found to be deficient the book concludes with an optimistic outlook hoping that rights advocates may in the future focus on improving such mechanisms for legal empowerment

studies and international education Educators across disciplines seeking to better understand the growing population of Chinese international students in North America will likewise benefit *The Meritocracy Trap* Daniel Markovits,2020-09-08 A revolutionary new argument from eminent Yale Law professor Daniel Markovits attacking the false promise of meritocracy It is an axiom of American life that advantage should be earned through ability and effort Even as the country divides itself at every turn the meritocratic ideal that social and economic rewards should follow achievement rather than breeding reigns supreme Both Democrats and Republicans insistently repeat meritocratic notions Meritocracy cuts to the heart of who we are It sustains the American dream But what if both up and down the social ladder meritocracy is a sham Today meritocracy has become exactly what it was conceived to resist a mechanism for the concentration and dynastic transmission of wealth and privilege across generations Upward mobility has become a fantasy and the embattled middle classes are now more likely to sink into the working poor than to rise into the professional elite At the same time meritocracy now ensnares even those who manage to claw their way to the top requiring rich adults to work with crushing intensity exploiting their expensive educations in order to extract a return All this is not the result of deviations or retreats from meritocracy but rather stems directly from meritocracy's successes This is the radical argument that Daniel Markovits prosecutes with rare force Markovits is well placed to expose the sham of meritocracy Having spent his life at elite universities he knows from the inside the corrosive system we are trapped within Markovits also knows that if we understand that meritocratic inequality produces near universal harm we can cure it When *The Meritocracy Trap* reveals the inner workings of the meritocratic machine it also illuminates the first steps outward towards a new world that might once again afford dignity and prosperity to the American people **The Transnational Politics of Higher Education** Meng-Hsuan Chou,Isaac Kamola,Tamson Pietsch,2016-02-26 This edited volume introduces readers to the relationship between higher education and transnational politics It shows how higher education is a significant arena for regional and international transformation as well as domestic political struggle replete with unequal power relations This volume shows The causes and impacts of recent transformations in higher education within a transnational context Emerging similarities in objectives institutional set ups and approaches taking place within higher education institutions across different world regions The asymmetrical relations between various kinds of institutional commercial and state actors across borders The extent to which historical and colonial legacies are important in the transformation of higher education The potential effects these developments have on the current structure of international political order Drawing on case studies from across the Middle East Asia Africa Latin America and Europe the contributors develop diverse perspectives explaining the impact of transnational politics on higher education and higher education on transnational politics across time and locality This book is among the first multi disciplinary effort to wrestle with the question of how we can understand the political role of higher education and the political force universities exert in the realm of international relations *SUMMING UP* JOHN MENADUE,2024-07-03 The world and its people are facing serious

local and global challenges Climate change economic instability limits to free speech threats to independent media reporting and increasing social inequality all signal the breakdown of democratic systems across the world Our political institutions and leaders are failing us with increasingly conservative policies that favour big business Far right political movements gain ascendancy and move whole nations towards fascism while American hostility to China threatens global security and economic prosperity Yet we learn and grow most when we are challenged by difference and adversity when we are out of our comfort zones Such experiences offer turning points for change I ve had many such turning points throughout my career and have become more radical as I ve grown older In 1999 I published my autobiography *Things You Learn Along the Way* This new collection continues with personal accounts and my views on issues that remain of concern to me It comprises posts I wrote for Pearls and Irritations along with several speeches interviews and articles I ve written over the past 14 years I hope these accounts continue to prompt readers to think question and act for a more just Australia and world
