## **Unlabelled Structure Of The Digestive System:**

Programmed Learning Punam Chopra,2008      **Gastrointestinal Hormones and Pathology of the Digestive System** Morton Grossman,2013-03-09 The discovery that the same or similar peptides are present in endocrine cells and in neurons is one of the most exciting and provocative recent developments in biology Suddenly neurophysiologists and endocrinologists have found that they have a great deal to discuss with each other Substances originally isolated as hypothalamic hormones turn out to be abundantly present in neurons of other parts of the brain and in endocrine cells and neurons of the gut and pancreas Similarly substances originally isolated as gut hormones are found not only in gut endocrine cells but also in gut neurons and in brain neurons It turns out that the group of peptides that we are accustomed to call gastrointestinal hormones are not all confined to the gastrointestinal tract and are not all solely hormones We are learning that the chemical transmitters of the neurocrine endocrine and paracrine systems form a single group of related substances This volume contains the latest installments in this fascinating story It tells how these peptides were isolated and their amino acid sequences determined how the heterogeneity of most perhaps all of these peptides is being revealed as variant forms of them are discovered how antibodies to these peptides are used as powerful tools to measure their concentrations in body fluids and to localize the cells in which they are synthesized and stored and finally how the role of these substances in normal physiology and in pathological states is being unraveled      Videodisc Correlatn GD Modern Biology 99 Holt Rinehart & Winston,1998-02      **Middle School Life Science** Judy Capra,1999-08-23 Middle School Life Science Teacher's Guide is easy to use The new design features tabbed loose sheets which come in a stand up box that fits neatly on a bookshelf It is divided into units and chapters so that you may use only what you need Instead of always transporting a large book or binder or box you may take only the pages you need and place them in a separate binder or folder Teachers can also share materials While one is teaching a particular chapter another may use the same resource material to teach a different chapter It's simple it's convenient      **Study and Master Agricultural Sciences Grade 12 CAPS Teacher's File** Altus Strydom,Henricho Ferreira,Peter J. Holmes,2014-06-26 Study Master Agricultural Sciences Grade 12 has been especially developed by an experienced author team for the Curriculum and Assessment Policy Statement CAPS This new and easy to use course helps learners to master essential content and skills in Agricultural Sciences      **Cellular Basis of Chemical Messengers in the Digestive System** Morton Grossman,2012-12-02 Cellular Basis of Chemical Messengers in the Digestive System contains the proceedings of an international symposium on the cellular basis of chemical messengers of the digestive system held in Santa Monica California on January 16 17 and 18 1980 The papers explore the entire spectrum of problems related to the cellular aspects of chemical messengers in the digestive system with emphasis on which amines and peptides serve these functions and in which neurons and endocrine paracrine cells each kind of chemical messenger is found This book is comprised of 28 chapters divided into six sections and begins by considering the nature of gut peptides and their

possible functions The discussion then turns to the diffuse neuroendocrine system and the phylogeny of the gastroenteropancreatic neuroendocrine system Methods such as immunocytochemistry electron immunohistochemistry and electron microscopy autoradiography are then described The following chapters focus on the function and morphology of endocrine paracrine cells immunochemical characterization of peptides in endocrine cells and nerves Langerhans islets as the neuro paraneuronal control center of the exocrine pancreas and regulation of metabolism by gastroenteropancreatic peptides The final section presents experimental results including in vitro studies of canine pseudo islets and of the mechanism of gastrin release This monograph will be of interest to physiologists and other practitioners in the field of medicine
