environment from a carbon source to a carbon sink through e.g. timber construction, high-rise buildings, circular bioeconomy, methods, AI-assisted design, smart recycling technology, multifunctional land use, integrated regional resource management, and community-based urban development to name just a few. This volume compiles the papers presented by world-renowned scientists, architects, spatial planners, activists, and policy makers at the Reconstructing the Future for People and Planet conference held at the Vatican in June 2022.
