New South African Review 6 Devan Pillay, Gilbert M Khadiagala, Roger Southall, Sarah Mosoetsa, Samuel Kariuki, 2018-01-29 Wide ranging essays demonstrate how the consequences of inequality extend throughout society and the political economy Despite the transition from apartheid to democracy South Africa is the most unequal country in the world Its extremes of wealth and poverty undermine intensifying struggles for a better life for all The wide ranging essays in this sixth volume of the New South African Review demonstrate how the consequences of inequality extend throughout society and the political economy crippling the quest for social justice polarising the politics skewing economic outcomes and bringing devastating environmental consequences in their wake Contributors survey the extent and consequences of inequality across fields as diverse as education disability agrarian reform nuclear geography and small towns and tackle some of the most difficult social political and economic issues How has the quest for greater equality affected progressive political discourse How has inequality reproduced itself despite best intentions in social policy to the detriment of the poor and the historically disadvantaged How have shifts in mining and the financialisation of the economy reshaped the contours of inequality How does inequality reach into the daily social life of South Africans and shape the way in which they interact How does the extent and shape of inequality in South Africa compare with that of other major countries of the global South which themselves are notorious for their extremes of wealth and poverty South African extremes of inequality reflect

increasing inequality globally and *The Crisis of Inequality* will speak to all those general readers policy makers researchers and students who are demanding a more equal world

Contradictions of Democracy Nicholas Rush Smith, 2019-01-17 Despite being one of the world's most vibrant democracies police estimate between five and ten percent of the murders in South Africa result from vigilante violence This is puzzling given the country's celebrated transition to democracy and massive reform of the state's legal institutions Where most studies explain vigilantism as a response to state or civic failure in *Contradictions of Democracy* Nicholas Rush Smith illustrates that vigilantism is actually a response to the processes of democratic state formation In the context of densely networked neighborhoods vigilante citizens often interpret the technical success of legal institutions for instance the arrest and subsequent release of suspects on bail as failure and work to correct such perceived failures on their own Smith also shows that vigilantism provides a new lens through which to understand democratic state formation Among young men of color in some parts of South Africa fear of extra judicial police violence is common Amid such fear instead of the state seeming protective it can appear as something akin to a massive vigilante organization An insightful look into the high rates of vigilantism in South Africa and the general challenges of democratic state building *Contradictions of Democracy* explores fundamental questions about political order the rule of law and democratic citizenship

Disaster Studies Janki Andharia, 2020-03-25 This book covers several dimensions of disaster studies as an emerging discipline It is the inaugural book in the series *Disaster Studies and Management* and deals with questions such as Is disaster management a field of practice a profession or simply a new area of study Exploring intersectionalities the book also examines areas of research that could help enhance the discourse on disaster management from policy and practice perspectives revisiting conventional event centric approaches which are the basis for most writings on the subject Several case studies and comparative analyses reflect a critical reading of research and practice concerning disasters and their management The book offers valuable insights into various subjects including the challenge of establishing inter and multi disciplinary teams within the academia involved in disaster studies and sociological and anthropological readings of post disaster memoryscapes Each of the contributors has an enduring interest in disaster studies thus enriching the book immensely This book will be of interest to all the students and scholars of disaster studies and disaster management as well as to practitioners and policymakers

Increasing Resilience to Climate Variability and Change Cecilia Tortajada, 2016-08-18 This book highlights the role that both infrastructure and governance play in the context of resilience and adaptation to climate variability and change Eleven case studies analyze in depth impacts of extreme events in projects basins and regions in the Arid Americas United States and Mexico Australia Brazil China Egypt France Nepal Mexico Pakistan Turkey and South Africa They discuss the importance of infrastructure mainly reservoirs in adaptation strategies how planning and management aspects should improve in response to changing climatic economic social and environmental situations and what the management institutional and financial challenges would be for their

implementation Governance aspects policies institutions and decision making and technical and knowledge limitations are a substantial part of the analyses The case studies argue that reservoirs are essential to build resilience contributing to adaptation to climate variability and change However that for them to be effective they need to be planned and managed within a governance framework that considers long term perspectives and multi sector and multi level actor needs and perspectives

Microstructural Geochronology Desmond E. Moser, Fernando Corfu, James R. Darling, Steven M. Reddy, Kimberly Tait, 2017-11-17 Microstructural Geochronology Geochronology techniques enable the study of geological evolution and environmental change over time This volume integrates two aspects of geochronology one based on classical methods of orientation and spatial patterns and the other on ratios of radioactive isotopes and their decay products The chapters illustrate how material science techniques are taking this field to the atomic scale enabling us to image the chemical and structural record of mineral lattice growth and deformation and sometimes the patterns of radioactive parent and daughter atoms themselves to generate a microstructural geochronology from some of the most resilient materials in the solar system First compilation of research focusing on the crystal structure material properties and chemical zoning of the geochronology mineral archive down to nanoscale Novel comparisons of mineral time archives from different rocky planets and asteroids and their shock metamorphic histories Fundamentals on how to reconstruct and date radiogenic isotope distributions using atom probe tomography Microstructural Geochronology will be a valuable resource for graduate students academics and researchers in the fields of petrology geochronology mineralogy geochemistry planetary geology astrobiology chemistry and material science It will also appeal to philosophers and historians of science from other disciplines

Deanship in the Global South Oliver J.J. Seale, 2021-02-08 The university today is a postmodern neo liberal competitive boundary less knowledge conglomerate a far cry from its historical traditional classical and collegial roots There is a body of literature on deanship that points to its evolving nature in the contemporary academe characterised by complexity and change Balancing academic demands simultaneously with the requirements for effective performance leadership and management lies at the heart of this very challenging bridging role nowadays Deans are generally former academics emerging from a traditional collegial space and often catapulted into the relatively unknown domain of executive management with its related problems Deans nowadays are required to be more than collegial intellectual leaders They are also meant to be fiscal and human resource experts fundraisers politicians and diplomats Deanship in the Global South Bridging Troubled Waters is about the deans lived reality as they try to balance the demands of both the academe from which they emerge and the administration to whom they now need to account Their lack of preparation and inadequate support points to the need for a more strategic integrated approach to leadership

development within their critical bridging roles between the academe and administration Social Constructions of Water Quality in South Africa Suvania Naidoo, 2022-05-04 This book details how the water quality of the Blesbokspruit River in Gauteng South Africa was socially constructed by stakeholders and key individuals in the context of acid mine drainage AMD and its treatment Social constructionism is used as the framing for this research to explain how water is intrinsically social Findings presented here show that stakeholders are aware that the changes in the physicality of the Blesbokspruit resulted from human interventions and varied uses of the water over the years Such knowledge among factors such as the historical context of mining current coal mining flows and volumes of water technology used and processes followed information and communication and vested interests influence social constructions of the water quality What counts as the truth about water varies depending on the individual s perspective their purpose and their individual interests Further how one defines water quality influences what treatment processes are preferred in order to improve water quality The book explains why for example a treatment process meant to improve water quality gained a bad reputation by the public because of the South African government s silo approach The book explains how these social constructions are entrenched in power relations between stakeholders regarding AMD treatment and illustrates how power was used to influence decisions to improve the water quality of the Blesbokspruit The case presented in this book offers insights and recommendations for policymakers working in water governance including means to influence social constructions of water quality and ways to clarify roles and responsibilities in pursuit of improved cooperative government **Minerals Yearbook** ,2011 *Trans-jurisdictional Water Law and Governance* Janice Gray, Cameron Holley, Rosemary Rayfuse, 2016-06-23 Governance of global water resources presents one of the most confounding challenges in contemporary natural resource governance With considerable government citizen and financial donor attention devoted to a range of international transnational and domestic laws and policies aimed at protecting managing and sustainably using fresh and coastal marine water resources this book proposes that sustainable water outcomes require a trans jurisdictional approach to water governance Focusing on the concept of trans jurisdictional water governance the book diagnoses barriers and identifies pathways to coherent and coordinated institutional arrangements between and across different bodies of laws at local national regional and international levels It includes case studies from the European Union Australia New Zealand South Africa the United States and Southeast Asia Leading specialists offer insights into the pretence and the promise of trans jurisdictional water governance and provide readers including students practitioners policy makers and academics with a basis for better analysing articulating and synthesising standards of good trans jurisdictional water governance both in theory and in practice **Uranium** Anthony Burke, 2017-07-03 Uranium the most atomically unstable natural element on earth has a unique place in the global geopolitics of resources It provides energy to millions of people and its isotopes are used to power spacecraft and in nuclear medicine But it is also at the heart of many of the planet s most deadly threats including nuclear devastation and radioactive

waste Its mining has caused bitter conflict with indigenous peoples and its testing in nuclear weapons has left a toxic legacy Yet the nonproliferation regime which aims to phase out nuclear weapons and manage the risks of nuclear energy is at risk of unravelling In this book Anthony Burke explores the geopolitical intrigue around uranium and the dilemmas of justice and security to which its development has given rise The twenty first century he cautions will be a time of reckoning and new reserves of political will must be found to manage the impact of this extraordinary mineral Only by cooperating to achieve multilateral disarmament and greater international control over nuclear power can we ward off nuclear catastrophe and harness the potential of nuclear energy to help address rather than create some of the world s most pressing problems

Evaluation of Small Business Support in Post-Apartheid South Africa Timothy Olaniyi Aluko, 2025-11-28 This book examines the effectiveness of Small Business Support programmes in South Africa and addresses the challenges and other fundamental issues of market failure The argument is that most intervention programmes do not always translate into positive economic development With that this book discusses and presents theory and conceptual models used to measure the effectiveness of a state grant funded programme and foregrounds perspectives and objectives of the programme from implementation evaluation and performance dimensions
