Corrupted Jonathan D Jansen, 2023-02 Through investigatory reports and interviews Jonathan Jansen reveals the structural conditions for chronic dysfunction in a sample of South African universities He reveals the political economy at work and the intense competition for resources on campuses He also provides interventions for these fragile institutions Why do some universities seem to be in a constant state of turmoil and dysfunction Jonathan Jansen explores the root causes of chronic instability in a sample of South African universities Through scrutiny of investigatory reports and interviews with more than 100 university managers and government officials Jansen finds that at the heart of the dysfunction in universities is an intense and sometimes deadly competition for resources especially on campuses located in impoverished communities It is not the lack of institutional resources but their concentration in a university that draws a mix of corrupt actors from local politicians and taxi operators to members of council and management into a never ending run on the material such as money for infrastructure and symbolic namely graduation certificates for sale assets of these institutions Jansen argues that the problem won't be solved through investments in capacity building alone because the combination of institutional capacity and institutional integrity contributes to serial instability in universities Jansen makes an important intervention to understanding the root causes and offers interventions to produce stabilities such as the depoliticisation of university councils and appointing academics of integrity and capacity in the management and leadership of these fragile institutions This groundbreaking and long overdue study will offer a promising way forward for universities to better serve their communities and the country more broadly

Structuring Mass Higher Education

David Palfreyman, Ted Tapper, 2012-10-12 Undoubtedly the most important development in higher education in recent years has been the seemingly inexorable expansion of national systems In a comparatively short time period many countries have moved from an elite to a mass model Furthermore expansion has invariably changed the whole experience of higher education for all the interested parties from presidents rectors and vice chancellors to first term undergraduates Structuring Mass Higher Education examines the impact of this change upon the existing national structures of higher education It also defines and highlights what makes an elite university something which institutions must strive for in order to gain their position as global players With case studies and contributions from a wide range of international authors the book explores questions such as Do higher education institutions retain a national significance even though the vestiges of an international reputation have long faded Has expansion undermined the quality of higher education because governments sought to expand on the cheap Is the elite institutional response to mass higher education perceived as a threat to be responded to with purposeful action that sustains their elite status Does the emergence of the international league tables pose a challenge to those responsible for governing elite institutions These are critical issues with which both policy makers and institutional leaders will have to grapple over the next ten years making Structuring Mass Higher Education a timely relevant and much needed text It will appeal to policy makers and practitioners within higher education as well as student and scholars worldwide
