Vaal University Of Technology Application:

Software Engineering Methods Design and Application Radek Silhavy,Petr Silhavy,2024-10-22 This book dives into contemporary research methodologies emphasising the innovative use of machine learning and statistical techniques in software engineering Exploring software engineering and its integration into system engineering is pivotal in advancing computer science research It features the carefully reviewed proceedings of the Software Engineering Research in System Science session of the 13th Computer Science Online Conference 2024 CSOC 2024 held virtually in April 2024

Sustainable Policy Applications for Social Ecology and Development Carayannis, Elias G.,2012-05-31 Social ecology is a philosophy rooted in deep seated social problems particularly in hierarchical political and social systems Social ecologists throughout the world maintain a theory that present ecological problems cannot be clearly understood much less resolved without resolutely dealing with problems within society Therefore social ecology locates the roots of these ecological crises firmly in the relations of domination between people Sustainable Policy Applications for Social Ecology and Development establishes a new set of platforms for intellectual discourse and identification of critical and strategic emerging issues the formulation of cogent and useful policies and practice recommendations This publication highlights provocative but scholarly views that diverge from the current conventional wisdom taking into consideration the concepts of robust competitiveness sustainable entrepreneurship and democratic capitalism central to its philosophy and objectives The aim of this book is to highlight emerging research and practice at the dynamic intersection of these fields where individuals organizations industries regions and nations are harnessing creativity and invention to achieve and sustain growth

Software Engineering Application in Systems Design Radek Silhavy,Petr Silhavy,Zdenka Prokopova,2023-01-01 This book presents the latest research on software engineering application in informatics The fields of software engineering informatics computer science and artificial intelligence are critical for study in the intelligent systems issue space This is the first part of the refereed proceedings of the 6th Computational Methods in Systems and Software 2022 CoMeSySo 2022 The CoMeSySo 2022 conference which is being hosted online is breaking down barriers CoMeSySo 2021 aims to provide a worldwide venue for debate of the most recent high quality research findings

Intelligent Systems Applications in Software Engineering Radek Silhavy,Petr Silhavy,Zdenka Prokopova,2019-09-19 This book presents real world problems and exploratory research that describes novel approaches in software engineering cybernetics and algorithms in the context of intelligent systems It constitutes the refereed proceedings of the 3rd Computational Methods in Systems and Software 2019 CoMeSySo 2019 conference a groundbreaking online conference that provides an international forum for discussing the latest high quality research results

Zukunft durch Informationstechnik Informationstechnische Gesellschaft,2004 Enhanced Chitosan Material for Water Treatment Ephraim Igberase,Peter Ogbemudia Osifo,Tumisang Seodigeng,Ikenna Emeji,2021-04-29 This book reviews some of the latest developments in the field of water treatment using multi functional

chitosan based materials It covers the production of chitosan beads and membranes from chitosan powder as well as modification techniques for enhancing the material for commercial and industrial purposes The book summarizes the results of experimental adsorption desorption studies for elucidating the underlying reaction mechanism of heavy metal removal from wastewater presenting an advanced overview of an array of characterization techniques such as Fourier transform infrared spectroscopy thermogravimetric analysis x ray diffraction and scanning electron microscopy Additionally it features a look at the development and application of specialized engineering software and image analysis for modelling the kinetics of adsorption This book is ideal for scientists and engineers working in the broader field of environmental materials science It is all well suited for chemists as well as industrial and civil engineers interested in wastewater treatment and mitigation of water pollution

Sustainable Chemistry Research Ponnadurai Ramasami,2023-10-24 This edited book of proceedings is a collection of seventeen selected and peer reviewed contributions from the Virtual Conference on Chemistry and its Applications VCCA 2022 VCCA 2022 was held online from 8th to 12th August 2022 The theme of the conference was Resilience and Sustainable Research through Basic Sciences 500 participants from 55 countries participated in VCCA 2022 This volume 2 reflects the chapters covering computational and industrial aspects

Modified Nanomaterials for Environmental Applications Onoyivwe Monday Ama,Suprakas Sinha Ray,Peter Ogbemudia Osifo,2021-11-16 This book focuses on the electrochemical and nanostructural properties of new photoanode electrolyte combinations used in the development of novel surface modified nanomaterials for environmental applications As water treatment is rapidly becoming a global challenge due to the increasing complexity and number of the various pollutants present the book explores fundamental issues relating to environmental applications of nanomaterials It addresses relevant topics ranging from electrochemical synthesis and characterization to applications of photoanodes in corrosion prevention and biosensors for wastewater treatment Featuring up to date experimental results on nanomaterials for detection of pharmaceuticals and heavy metals in wastewater this contributed volume is useful to electrochemical researchers materials scientists and chemical and civil engineers interested in advanced photoelectrochemical research for environmental applications

Nanohybrid Materials for Water Purification Sarat K. Swain,2022-08-12 This book comprehensively reviews the key topics in the area of nanocomposites and hybrid materials used for waste water treatment and purification It covers materials chemistry various synthesis

approaches and properties of these nanomaterials for the different water purification techniques It provides new direction to the readers to better understand the chemistry behind these materials and the methods to improve their properties This book will be a very valuable reference source for graduates and postgraduates engineers research scholars primarily in the field of material science water nanoscience and nanotechnology material scientists researchers in the water related area scientists working in water treatment plans and pollution mitigation industries From Internet of Things to Internet of Intelligence

Marcel Ohanga Odhiambo, Weston Mwashita, 2024-04-22 The book focuses on the open challenges associated with the convergence of the Internet of Things and Artificial Intelligence as accommodated in 6G architecture The authors discuss how in many fields such as Natural Language Processing NLP interactive computer games robotics and multiuser virtual environments this convergence is likely to have enormously benefits from artificial intelligence mimicking human intelligence attempting to simulate human intelligence and producing a new intelligent machine capable of processing information with human consciousness behaviour and thinking integrated with appropriate algorithms The book provides users with the fundamentals of IoT architecture AI technology and the architecture of AI and IoT converged networks Furthermore to provide hands on experience with the technology some proposed systems are discussed along with their applications in various sectors such as healthcare transportation smart homes production manufacturing renewable energy and agriculture The book will discuss new technological advances current research trends and industry requirements Discussed open challenges in the field will motivate researchers and stakeholders in industry to provide solutions with some presented in the book to help spark ideas *Deanship in the Global South* Oliver J.J. Seale, 2021-02-08 The university today is a postmodern neo liberal competitive boundary less knowledge conglomerate a far cry from its historical traditional classical and collegial roots There is a body of literature on deanship that points to its evolving nature in the contemporary academe characterised by complexity and change Balancing academic demands simultaneously with the requirements for effective performance leadership and management lies at the heart of this very challenging bridging role nowadays Deans are generally former academics emerging from a traditional collegial space and often catapulted into the relatively unknown domain of executive management with its related problems Deans nowadays are required to be more than collegial intellectual leaders They are also meant to be fiscal and human resource experts fundraisers politicians and diplomats Deanship in the Global South

Bridging Troubled Waters is about the deans lived reality as they try to balance the demands of both the academe from which they emerge and the administration to whom they now need to account Their lack of preparation and inadequate support points to the need for a more strategic integrated approach to leadership development within their critical bridging roles between the academe and administration **Redefining Education and Development** Kaitano Dube, 2024-10-18 The book aligns with the United Nations Sustainable Development Goals SDGs particularly Goal 4 which focuses on quality education It explores the evolving role of education as a critical driver for achieving all 17 SDGs by providing a platform for discussing

innovative educational models and theories that foster sustainable development The book takes an interdisciplinary approach merging educational theory developmental practice and human psychology to address complex global challenges hindering sustainable development The book includes case studies and empirical research such as exploring student entrepreneurship in the agricultural sector and the factors bridging the gap between entrepreneurial intention and venture creation These examples provide readers with practical applications of theoretical concepts and demonstrate the real world impact of educational innovations which is at the core of education delivery for all and how education touches on other areas of the SDGs The book offers valuable insights for policymakers educators and development practitioners by presenting research and theory based analyses It suggests ways to improve the academic environment to foster entrepreneurship and innovation which are key to economic development and job creation especially in regions with high youth unemployment rates The content suggests educational reforms that are responsive to the changing societal and economic landscapes The book's blend of theory and practice targets a broad audience including academic scholars students development agencies non governmental organisations and policymakers It seeks to engage these diverse readers in a conversation about the future of education and its role in achieving sustainable development In summary the book seeks to provide a comprehensive exploration of the nexus between education development and human needs in the context of the SDGs offering innovative perspectives and practical solutions to equip readers to contribute to sustainable global development
