recession relatively well in part by using the sizable fiscal and monetary policy ammunition accumulated during prior years of strong growth. However, their growth prospects have weakened since then and many now have less policy space. This study provides the first comprehensive stocktaking of the past decade from the perspective of emerging market and developing economies. Many of these economies have now become more vulnerable to economic shocks. The study discusses lessons from the global recession and policy options for these economies to strengthen growth and prepare for the possibility of another global downturn.

Anthropogenic Environmental Hazards Pankaj Pathak, Rajiv Ranjan Srivastava, Sadia Ilyas, 2023-10-27

This book delves into the anthropogenic activities responsible for environmental hazards, their compensation and potential mitigation strategies. It sheds light on the major contributors to the climate change issues aggravated by non-sustainable practices for the overexploitation of natural resources. Critical topics such as high emissions in primary mining, the recovery of energy-critical metals by urban mining, solid waste management and forest conservation are explored, offering insights into the urgent challenges we face. Amidst the rapid demand for resources and the expansion of human habitats, the book emphasizes the need for new approaches to natural resource management and introspection of our actions. Experts in the field discuss existing anthropogenic environmental hazards in detail alongside environmental compensation and effective mitigation approaches. The book begins with a chapter dedicated to risk assessment in primary mining activities for precious metals, proposing potential routes for mitigation. Chapter 2 focuses on assessing and mitigating the environmental footprints of energy-critical metals used in permanent magnets. In Chapter 3, a case study examines sustainable resource utilization through end-of-life room air conditioner recycling. Additional chapters provide critical insights into the environmental impacts of e-waste and government policies for responsible management. Hazards associated with industrial effluents and corresponding mitigation strategies, the role of roadside plants in phytoremediation of heavy metal pollution, sustainable utilization of anthropogenic coal fly ash through mechanical and chemical activation, environmental damages resulting from the mismanagement of municipal solid waste, environmental problems and remediation strategies for anthropogenic biomass waste, challenges in sustainable municipal solid waste management and suggestions for environmental risk mitigation. The book concludes with a chapter discussing collaborative governance and non-monetary compensation mechanisms for sustainable forest management. Given its breadth, this book serves as an indispensable resource for researchers, policymakers and environmental professionals seeking sustainable approaches to tackle pressing environmental challenges.
