Cortellessa, 2010-09-21 This volume contains the proceedings of the 7th European Performance Engineering Workshop EPEW 2010 held in Bertinoro Italy on September 23-24 2010 The purpose of this workshop series is to gather academic and industrial researchers working on all aspects of performance engineering This year the workshop was structured around three main areas system and network performance engineering software performance engineering and the modeling and evaluation techniques supporting them This edition of the workshop attracted 38 submissions whose authors we wish to thank for their interest in EPEW 2010 After a careful review process during which every paper was refereed by at least three reviewers the Program Committee selected 16 papers for presentation at the workshop We warmly thank all the members of the Program Committee and all the reviewers for their fair and constructive comments and discussions The workshop program was enriched by two keynote talks given by Marco Roccetti and Ralf Reussner We conclude by expressing our gratitude to all the people who contributed to the organization of EPEW 2010 in particular the staff of the University Residential Center of Bertinoro We are also grateful to the EasyChair team for having allowed us to use their conference system and Springer for the continued editorial support of this workshop series      Parallel Computing and Transputer Applications Mateo

Valero,1992 Mathematics of Computing Parallelism      High Performance Computing Mateo Valero,Kazuki Joe,Masaru Kitsuregawa,Hidehiko Tanaka,2003-06-29 I wish to welcome all of you to the International Symposium on High Performance Computing 2000 ISHPC 2000 in the megalopolis of Tokyo After having two great successes with ISHPC 97 Fukuoka November 1997 and ISHPC 99 Kyoto May 1999 many people have requested that the symposium would be held in the capital of Japan and we have agreed I am very pleased to serve as Conference Chair at a time when high performance computing HPC has a significant influence on computer science and technology In particular HPC has had and will continue to have a significant impact on the advanced technologies of the IT revolution The many conferences and symposiums that are held on the subject around the world are an indication of the importance of this area and the interest of the research community One of the goals of this symposium is to provide a forum for the discussion of all aspects of HPC from system architecture to real applications in a more informal and personal fashion Today we are delighted to have this symposium which includes excellent invited talks tutorials and workshops as well as high quality technical papers      Coordination Models and Languages Farhad Arbab,Carolyn Talcott,2003-08-01 This volume contains the proceedings of the Fifth International Conference on Coordination Models and Languages Coordination 2002 held in York UK 8-11 April 2002 Coordination models and languages close the conceptual gap between the cooperation model used by the constituent parts of an application and the lower level communication model used in its implementation Coordination based methods provide a clean separation between individual software components and their interactions within their overall software organization This separation together with the higher level abstractions offered by coordination models and languages improve software productivity enhance maintainability advocate modularity promote reusability and lead to software organizations and architectures that are more tractable and more amenable to verification and global analysis Coordination is relevant in design development debugging maintenance and reuse of all complex concurrent and distributed systems Specifically coordination becomes paramount in the context of open systems systems with mobile entities and dynamically reconfigurable evolving systems Moreover coordination models and languages focus on such key issues in Component Based Software Engineering as specification interaction and dynamic composition of components      **AI in Material Science** Syed Saad,Syed Ammad,Kumeel Rasheed,2024-07-26 This book explores the transformative impact of artificial intelligence on material science and construction practices in the Industry 4.0 landscape It enquires into AI history and applications examining material optimization smart materials and AI in construction Covering automation robotics and AI assisted design the book provides insights into ethical considerations and future trends A modern reference for scholars and professionals it bridges academia and practical applications in the dynamic intersection of AI and materials science      *River Flow 2020* Wim Uijttewaald,Mário J. Franca,Daniel Valero,Victor Chavarrias,Clàudia Ylla Arbós,Ralph Schielen,Alessandra Crosato,2020-08-27 Rivers form one of the lifelines in our society by providing essential services such as availability of fresh water navigation energy ecosystem services and flood conveyance Because of this

essential role mankind has interfered continuously in order to benefit most and at the same time avoid adverse consequences such as flood risk and droughts This has resulted in often highly engineered rivers with a narrow set of functions In the last decades rivers are increasingly considered in a more holistic manner as a system with a multitude of interdependent processes River research and engineering has therefore added to the river fundamentals also themes like ecohydraulics consequences of climate change and urbanisation River Flow 2020 contains the contributions presented at the 10th conference on Fluvial Hydraulics River Flow 2020 organised under the auspices of the Committee on Fluvial Hydraulics of the International Association for Hydro Environment Engineering and Research IAHR What should have been a lively physical gathering of researchers students and practitioners was converted into an online event as the COVID 19 pandemic hindered international travelling and large gatherings of people Nevertheless the fluvial hydraulics community showed their interest and to be very much alive with a high number of participations for such event Since its first edition in 2002 in Louvain la Neuve this series of conferences has found a large and loyal audience in the river research and engineering community while being also attractive to the new researchers and young professionals This is highlighted by the large number of contributions applying for the Coleman award for young researchers and also by the number of applications and attendants to the Master Classes which are aimed at young researchers and students River Flow 2020 aims to provide an updated overview of the ongoing research in this wide range of topics and contains five major themes which are focus of research in the fluvial environment river fundamentals the digital river the healthy river extreme events and rivers under pressure Other highlights of River Flow 2020 include the substantial number of interdisciplinary subthemes and sessions of special interest The contributions will therefore be of interest to academics in hydraulics hydrology and environmental engineering as well as practitioners that would like to be updated about the newest findings and hot themes in river research and engineering

web uvc camera module plug n play usb cameras fitting all platforms supporting video conferencing live streaming spi cameras you can use w any microcontroller exclusive single multiple camera solutions designed for low power applications spi camera series based on 2mp and 5mp sensors

**arducam mega 5mp spi camera with esp32 wifi module** - Jun 05 2022

web mar 14 2023 the arducam mega camera is a new camera solution recently launched by arducam that simplifies the process of connecting one or more cameras to any microcontroller this camera is specifically designed for low power iot devices embedded machine vision and artificial intelligence applications

*how to use ov7670 camera module with arduino circuit digest* - Jun 17 2023

web apr 9 2019 in this tutorial we will interface most widely used camera module ov7670 with arduino uno the camera module ov7670 can be interfaced with arduino mega with same pin configuration code and steps the camera module is hard to interface because it has large number of pins and jumbled wiring to carry out

*camera interfacing msp low power microcontroller forum* - Feb 01 2022

web i have searched for camera sensors which can give the digital data out but their availability is not there agilent's camera sensor can give the output in digital format no video data i want to process please tell me if it is possible to interface a

camera module with msp430f6638 microcontroller and if yes which camera module i can use

**interfacing the tcm8230md cmos camera with an arm7** - May 04 2022

web this camera has tremendous application to microrobotic systems microcontrollers such as the arm9 have dedicated hardware to simplify interfacing this or any other camera with an inter integrated circuit 85 mhz 8 bit data bus interface however the arm9 is a more complicated microcontroller to work with both in terms of software and hardware

**interfacing camera module with mcu all about circuits** - Aug 07 2022

web aug 26 2020 1 hello guys i ve got a project i m working on right now which involves making use of a camera i d like to know what microcontroller would be the most suitable to interface a camera module to i ve tried using the esp32 wifi camera but decided to discard it due to the small frame rate and high latency in my case

**arducam mega best camera solution for any microtronller** - Feb 13 2023

web ready for any microcontroller one camera for all this is how arducam mega works it fits any microcontroller with a single standard spi interface either native or mimic one 8 bit 16 bit or 32 bit arm risc v or others literally any only six pins are required

raspberry pi how to interface camera sensor to microcontroller - Oct 09 2022

web apr 28 2020 at 22 41 there are already plenty of reasonably priced sensors that interface directly to the rpi s camera port what more do you need you can combine a sensor with a pi zero for about 30 and program custom algorithms to your heart s content dave tweed apr 28 2020 at 23 16

**interfacing 5mp spi camera with esp32 wifi module how** - Mar 14 2023

web jul 26 2023 video tutorial guide overview this tutorial is about arducam mega camera as we will be interfacing this 5mp spi camera with esp32 wifi module recently arducam launched a legendary camera solution that helps you connect one or more cameras to any microcontroller without the least effort

**cmos camera interface on a usb microcontroller** - Mar 02 2022

web sep 7 2012 1 hi i would like to interface a cmos based camera to a usb device microcontroller i need to use the microcontroller for grabbing frames from the cmos camera and send it to a usb host controller eg a pc i have a cmos camera similar but from different vendor to the one mentioned in the following link
