Justin Roberts,2017-11-07 The Nordic Tractor traces the history of tractor production in Sweden and Finland The story goes back over 200 years to the 19th century when the industrial revolution was sweeping across Britain and Sweden wanted to establish their own manufacturing powerhouses This was an exciting and fast moving time for engineering and this book traces the ups downs and eventual demise of some of the first manufacturers working to serve the particular needs of the agricultural and forestry industries in this densely forested and mountainous region It then looks in depth at the companies who emerged from this who learnt from their own and others mistakes and built on the widespread technological advances of the time to build up names for themselves in Northern parts of Europe Today Valtra now owned by AGCO stands proudly as the last remaining agricultural tractor maker in Scandinavia but The Nordic Tractor shows where their roots lie in the establishment and history of companies such as Bolinder Munktells Volvo and Valmet who all stood out as being major players in the Nordic region Including over 100 photos many of which have been previously unpublished this book will appeal to those with a specific interest in Nordic tractors Nordic engineering and general Nordic history as well as the general tractor enthusiast

Pulp & Paper ,1988 Paper Technology ,2003 *Paper* ,1989 *Transaction Management Support for Cooperative Applications* Rolf A. de by,Wolfgang Klas,J. Veijalainen,2012-12-06 Transaction Management Support for Cooperative Application is a comprehensive report on a successful international project called TRANSCOOP carried out from 1994 to 1997 by a group of European scientists But the book is also much more than that namely an ambitious attempt to integrate Computer Supported Cooperative Work CSCW Workflow Management Systems WFMS and Transaction Processing TP technologies The very term em cooperative transactions is in itself contradictory Cooperation technologies such as CSCW aim at providing a framework for information exchange between cooperating human participants In contrast traditional transaction technologies allow concurrent users to operate on shared data while providing them with the illusion of complete isolation from each other To overcome this contradiction the TRANSCOOP researchers had to come up with a new and original notion of correctness of concurrent executions based on controlled exchange of information between concurrent users Merging histories in accordance with prespecified commutativity rules among concurrent operations provides transactional guarantees to activities such as cooperative designing which until now had to be carried out sequentially As an interesting consequence it also provides a basis for management of consistency between disconnected or mobile users who operate independently and yet must occasionally reconcile their work with each other *Marine Engineering/log* ,1985
