**Instructional Models in Reading** Steven A. Stahl,David A. Hayes,2013-04-03 This book started with a simple idea examine models of reading instruction that have emerged during the past 20 years These models span a wide range of instruction representing a continuum from highly structured task analytic instruction to child centered and holistic instruction Each model has its own epistemology or views on how reading and instruction are to be defined The different epistemologies indicate different principles of instruction which in turn indicate different practices in the classroom Each model is also supported by a different research base In this volume leading proponents of these different models discuss their ideas about reading instruction thereby encouraging readers to make their own comparisons and contrasts The chapter authors seem to adopt the editors eclectic approach to some greater or lesser extent incorporating aspects of other models into their instruction as they see other goals Thus models of reading instruction are complex Complicating matters further is the fact that teachers hold their own models of reading which may or may not be congruent with those discussed here Although academically developed models influence college preservice and in service instruction teachers own models of reading filter the information that they take from what they learn from these perspectives By carefully examining these variables this book makes a firm contribution toward disciplined inquiry into what it means to teach reading The Journey of Duty: From Africa to Europe Olgett Kazimoto,2024-03-01 Early life experiences of the author in the northern province of Zambia in Africa and training in healthcare with subsequent employment in the mining industry healthcare owned jointly by the Anglo American Corporation and the Government of the Republic of Zambia mark the beginning of the journey of duty After working for eight years from 1990 to 1998 this initial part of the journey of duty becomes full of challenging encounters and adventure stories associated with copper mining operations Moving to Britain as a migrant worker marks the second part of the long journey of duty Over the next 22 years the author is immersed in the busy National Health Service NHS an umbrella organisation for thousands of hospitals and allied institutions Experiencing the British way of life becomes

fascinating but then part of this way of life is about how politics influence the way healthcare is delivered by the NHS which takes the centre stage throughout the rest of this book The NHS tales about its origins evolution inspiring radical transformation in the 21st century traffic light targets and the dark times of scandals with red tape are quite revealing especially for people intending to work train or are working as healthcare professionals In the thick of it are some of the shining stars with rare qualities of fixing the broken parts of the healthcare systems that end this book
