ABOUT UNIVERSAL RECIPE CONVERTER:

This spreadsheet program will convert most recipes. It will take your standard formula and cut it in half or double it. You decide the batch size and it will adjust all ingredients to the proper amount.

It will take seven different methods of measurements and convert.

OO GR CUP TBS TSP ML DROP

OO and GR are weight measurements, the others are volume measurements.

It is always recommended to use recipes that are in weight measurements.

With volume measurements it is harder to get consistent results.
