Universitu Of Pretoria In Prospectors:

The History of Geophysics in Southern Africa Johan H de Beer, 2016-01-25 Geophysics is a comparatively young science which only evolved as a distinct discipline during the 19th century. However its phenomena like earthquakes tsunamis volcanic eruptions and lightning had been objects of fear curiosity and speculation since ancient times. In this book Johan de Beer and his research team reveal that geophysical activity in South Africa can be traced back to as early as 1488. This is a truly astonishing revelation which deserves to be firmly entrenched as part of the country's proud history. The book also discusses the history and formation of South African geophysical institutions that made a huge and seldom acknowledged contribution to the technological development of southern Africa. **Congress Volume Stellenbosch 2016**, 2017-12-19 This volume presents the main lectures of the 22nd Congress of the International Organization for the Study of the Old Testament IOSOT held in Stellenbosch South Africa in September 2016. Sixteen internationally distinguished scholars present their current research on the Hebrew Bible including the literary history of the Hebrew text its Greek translation and history of interpretation. Some focus on archeological and iconographic sources and the reconstruction of ancient Israelite religion while others discuss the formation of the biblical text and its impact for cultural memory. The volume gives readers a representative view of the most recent developments in the study of the Old Testament. Thriving in a New World Economy Kirk Plangger, 2015-10-20 This volume includes the full proceedings from the 2012 World Marketing Congress and Cultural Perspectives in Marketing held in Atlanta Georgia with the theme Thriving in a New World Economy. The focus of the conference and the enclosed papers is on global marketing thought issues and practices. This volume presents papers on various topics including marketing management marketing strategy and consumer behavior. Founded in 1971 the Academy of Marketing Science is an international organization dedicated to promoting timely explorations of phenomena related to the science of marketing in theory research and practice. Among its services to members and the community at large the Academy offers conferences congresses and symposia that attract delegates from around the world. Mapungubwe: Ancient African Civilisation on the Limpopo THOMAS N HUFFMAN., 2005 *The Palgrave Handbook of Africa and the Changing Global Order* Samuel Ojo Oloruntoba, Toyin Falola, 2021-11-22 This handbook fills a large gap in the current knowledge about the critical role of Africa in the changing global order. By connecting the past present and future in a continuum that shows the paradox of existence for over one billion people the book underlines the centrality of the African continent to global knowledge production the global economy global security and global creativity. Bringing together perspectives from top Africa scholars it actively dispels myths of the

continent as just a passive recipient of external influences presenting instead an image of an active global agent that astutely projects soft power Unlike previous handbooks this book offers an eclectic mix of historical contemporary and interdisciplinary approaches that allow for a more holistic view of the many aspects of Africa's relations with the world

Ownership and Governance of Companies Jonathan Michie, Vishnu Padayachee, 2021-06-29 Apartheid South Africa was often thought to run in the interests of the business elite Yet 27 years after apartheid those business interests remain largely entrenched Why Did the South African business community play a role in engineering this outcome perhaps recognising the apartheid era was over and jumping ship in time Conversely the mission of the ANC was widely perceived to be to shift wealth and power into the hands of the whole community Yet despite black empowerment measures corporate ownership remains largely in white hands and certainly in the hands of an elite few even though no longer restricted to whites This picture is replicated across the global south where corporate ownership tends to be concentrated in the hands of an elite rather than being more democratically spread Why have alternative corporate forms not been pursued more vigorously with ownership in the hands of customers employees and local communities In the case of South Africa where the majority of customers and employees are black this could have delivered on the ANC's mission to replace the apartheid era with a democratic one in terms of wealth incomes and power as well as in terms of voting and civic rights This edited volume explores all these questions and looks at ways to align corporate forms with economic and social goals The chapters in this book were originally published as special issues of *International Review of Applied Economics*

Origin and Evolution of the Cape Mountains and Karoo Basin Bastien Linol, Maarten J. de Wit, 2016-09-03 This book describes the latest research on the geological geochemical geochronological biological and geomorphic evolution of the unique and relatively pristine landscape of the Cape Mountains and the Karoo Basin a region in South Africa that is currently being targeted for shale gas exploration and development With up to date graphics maps drill core and seismic data it offers the latest observations and synthesis and highlights areas of ongoing research The work presented also considers a wider connection of the Cape Karoo system to other basins in Central Gondwana including South America thus following in the footsteps of A L du Toit Clearly there is still much to be learned before shale gas development can be considered and this book provides some timely perspectives

South Africa's Top Sites Philip Harrison, 2004 The whole series is the author who knows and believes that in South Africa there are many many areas that are as yet unexplored that offer the visitor and reader a fascinating insight into our South African heritage and an understanding of the global concerns
