Multidimensional Ranking Frans A. van Vught, Frank Ziegele, 2012-02-22 During the last decades ranking has become one of the most controversial issues in higher education and research It is widely recognized now that although some of the current rankings can be severely criticized they seem to be here to stay In addition rankings appear to have a great impact on decision makers at all levels of higher education and research systems worldwide including in universities Rankings reflect a growing international competition among universities for talent and resources at the same time they reinforce competition by their very results Yet major concerns remain as to the rankings methodological underpinnings and to their various impacts This new book presents a comprehensive overview of the current state of the art of ranking in higher education and research and introduces a completely new approach called multidimensional ranking In part 1 rankings are discussed in the broader context of quality assurance and transparency in higher education and research In addition the many current ranking methodologies are analyzed and criticized and their impacts are explored In part 2 a new approach to ranking is introduced based on the basic idea that higher education and research institutions have different profiles and missions and that the performances of these institutions should reflect these differences This multidimensional approach is operationalized in a new multidimensional and user driven ranking tool called U Multirank U Multirank is the outcome of a

Quality in Higher Education David Andrew Turner, 2012-01-01 The quality of higher education is a hot topic especially as students around the world are asked to pay more towards their own education and expect to get what they pay for In addition league tables both national and international have come to dominate discussion with several governments and many institutions setting themselves the goal of improving their ratings In this volume Professor Turner examines the assumptions that are being made about what counts as quality and what the traditional purposes of universities are But with the growth of mass higher education and the rise of student centred approaches to learning and teaching it has become increasingly clear that high quality education is education that meets the needs of the student at that particular moment and promotes their future development After examining a range of different approaches to the quality of higher education and its measurement Professor Turner develops an approach to benchmarking and quality enhancement that is better suited to the ethos of individualised learning and uses it to critique the philosophies that have dominated debates about quality to date This book will be of interest to scholars of higher education but also has something important to add to debates that engage policy makers in higher education It provides a background to the historical development of universities which might help postgraduate students and new members of faculty understand the process in which they are engaged
