TechniUM., 1974 **Princeton Alumni Weekly**, 1960 **Abstracts of Papers Presented to the American Mathematical Society** American Mathematical Society, 2001 *The Theory of Oligopoly with Multi-Product Firms* Koji Okuguchi, Ferenc Szidarovszky, 2012-12-06 In the mid 1960's both authors undertook independent works in oligopoly and game theory However it was not until 1983 that they formally met Since then they have continued meeting either in Budapest or Tokyo Their collaboration has resulted in numerous publications as well as in this work Essentially this book has two origins First it originated in previous results either published or circulated in mimeograph form Finely sifting their results the authors constructed a concise reinterpretation of their achievement to date However this unifying process led to the second origin Reconsideration particularly in this comprehensive approach generated new results This was especially

true in the analysis of the existence uniqueness and global stability of the Cournot Nash equilibrium for oligopoly with multi product firms and for several modified Cournot and related models This book should be ideal for graduate students in economics or mathematics However as the authors have firmly grounded their ideas in the formal language of mathematics the student should possess some background in calculus linear algebra and ordinary differential and difference equations Additionally the book should be useful to researchers in oligopoly and game theory as well as to mathematically oriented economists The methodology developed for analyzing the existence and stability of oligopoly equilibrium should prove useful also in theoretical analysis of other economic models We are both very grateful to Professor Wilhelm Krelle for his careful review and helpful suggestions In addition Koji Okuguchi wishes to thank Professors W Adrift William C.
