and public duty a university in an impoverished community is also a rich concentration of resources around which corrupt staff students and those outside of campus all vie for access Taking a political economic approach Jonathan Jansen describes the daily struggle for institutional resources and offers accessible sensible insights He argues that the problem won't be solved through investments in capacity building alone because the combination of institutional capacity and institutional integrity contributes to serial instability in universities Rather durable solutions would include the depoliticisation of university councils and appointments of academics with integrity and capacity to manage and lead these fragile institutions This groundbreaking and long overdue study will offer a promising way forward for universities to better serve their communities and the country more broadly

**South African urban imaginaries: cases from Johannesburg** Richard Ballard, Sandiswa Mapukata, 2022-06-01 How do government officials elected politicians powerful economic actors and ordinary people think and talk about the urban geography of South Africa How do they describe and represent change that is happening in cities towns and villages Do they consider these changes to be good or bad How do they think such places should change What do they do to try to bring about the changes they desire Competing answers to these questions have been at the centre of South Africa's urban development Through the 19th and 20th centuries white minority governments straddled quite contradictory imaginaries about who could build lives for themselves in urban areas and on what terms Ordinary people held their own urban imaginaries that were quite different to those of white minority governments and were core to the fight for democracy In the democratic era a range of official and popular imaginaries offer diverse visions on how South Africans should be transformed In an earlier collection produced under the GCRO Spatial Imaginaries project we explored the sometimes contradictory nature of post apartheid urban visions with for example with some promoting the creation of new urban settlements on greenfield sites and others attempting to densify and diversify long urbanised spaces Research Report 13 South African urban imaginaries Cases from Johannesburg is a second edited collection under the Spatial Imaginaries project and it uses a series of cases from Johannesburg that illustrate the interactions between urban imaginaries and the material city These cases include the depiction of central business districts in film as spaces of aspiration the way in which the imaginaries of developers in Hillbrow were shaped by the lives of those living there the imaginaries of Alexandra Renewal Project practitioners the way in which residents of Brixton understand diversity and the construction of two new bridges across the M1 to better connect Sandton and Alexandra

governments are widening access to higher education for students from traditionally underrepresented groups. However, this raises questions about whether this rapid growth may in fact compromise academic quality. This book presents case studies of how higher education institutions in diverse countries are maintaining academic excellence while increasing the access and participation of students from historically underrepresented backgrounds. Including case studies spanning four continents, the authors and editors examine whether increasing widening participation positively impacts upon academic quality. This volume will be of interest and value to students and scholars of global higher education representation and participation in education and quality in higher education.
