Adolescent Psychology in Today's World Michael J. Nakkula,Andrew J. Schneider-Muñoz,2018-11-02 This groundbreaking three

volume set spotlights how conditions around the world are affecting the healthy development of adolescents in their respective environments on all six continents. Continually unstable or perpetually poor economic conditions, globalization and rapid technological change are just three of the forces affecting a group of 1.2 billion strong today, a demographic poised to become our world leaders and catalysts in the not too distant future. The world's adolescents, led by two editors who have been dedicated to studying adolescent development worldwide for decades, this novel collection of works from contributors in more than 40 countries emphasizes how possibilities for healthy mental and physical development are affected by the difficulties youths face in their countries and how these challenges have shaped and are shaping contemporary teenage life today. The set comprehensively addresses issues for adolescents across the globe such as the day-to-day challenges of poverty, inadequate education, violence or war, disease, reproductive matters, globalization and technological challenges, and more, while also providing a strengths-based focus in the volumes showing how and why some teenagers in each country have surmounted the challenges and forged stronger characters to better their worlds. These stories document more than personal victories and their experiences matter far more than the adolescents themselves. In its *State of the World's Children 2011* report, UNICEF noted that the world community needs to turn its attention to adolescents in need, explaining that focusing on this large and potentially powerful group makes economic sense as well as being a necessary step in working towards achieving human justice. By addressing the risks, challenges, and strengths of teenagers as a group in countries worldwide, this work serves to break the cycle of poverty, violence, discrimination, and death for adolescents.

Emerging Infectious Diseases, 2007-07 *The Routledge Companion to Global Indigenous History* Ann McGrath, Lynette Russell, 2021-09-30

The *Routledge Companion to Global Indigenous History* presents exciting new innovations in the dynamic field of Indigenous global history while also outlining ethical, political, and practical research. Indigenous histories are not merely concerned with the past but have resonances for the politics of the present and future, ranging across vast geographical distances and deep time periods. The volume starts with an introduction that explores definitions of Indigenous peoples, followed by six thematic sections which each have a global spread: European uses of history and the positioning of Indigenous people as history's outsiders; their migrations and mobilities; colonial encounters, removals, and diasporas; memory, identities, and narratives; deep histories and pathways towards future Indigenous histories that challenge the nature of the history discipline itself. This book illustrates the important role of Indigenous history and Indigenous knowledges for contemporary concerns including climate change, spirituality, and religious movements, gender negotiations, modernity and mobility, and the meaning of nation and the global. Reflecting the state of the art in Indigenous global history, the contributors suggest exciting new directions in the field, examine its many research challenges, and show its resonances for a global politics of the present and future. This book is invaluable reading for students in both undergraduate and postgraduate Indigenous history courses.

Corrupted Jonathan D Jansen, 2023-02-01

In South African higher education, the images of dysfunction are everywhere. Student protests, violence,

Police presence Rubber or real bullets Class disruptions Burning tyres Damaged buildings Injury and sometimes death Reports of wholesale corruption Year after year often in the same set of universities the problem of routine instability seems insoluble The financial academic and reputational costs of ongoing dysfunction are high especially for those universities caught up in the never ending struggle to overcome apartheid legacies Any number of explanations have been ventured including a lack of resources shortage of capacity rural location corrupt officials and endemic conflict Corrupted takes a deeper look at dysfunction in an attempt to unravel the root causes in a sample of South African universities At the heart of the problem lies the vexed issue of resources or more pertinently the relationship between resources and power who gets what and why Whatever else it aspires to be commonly a place of teaching learning research and public duty a university in an impoverished community is also a rich concentration of resources around which corrupt staff students and those outside of campus all vie for access Taking a political economic approach Jonathan Jansen describes the daily struggle for institutional resources and offers accessible sensible insights He argues that the problem won't be solved through investments in capacity building alone because the combination of institutional capacity and institutional integrity contributes to serial instability in universities Rather durable solutions would include the depoliticisation of university councils and appointments of academics with integrity and capacity to manage and lead these fragile institutions This groundbreaking and long overdue study will offer a promising way forward for universities to better serve their communities and the country more broadly

Mergers and Alliances in Higher Education Adrian Curaj, Luke Georghiou, Jennifer Cassingena Harper, Eva Egron-Polak, 2015-03-31 This volume casts light on mergers and alliances in higher education by examining developments of this type in different countries It combines the direct experiences of those at the heart of such transformations university leaders and senior officials responsible for higher education policy with expert analysts of the systems concerned Higher education in Europe faces a series of major challenges The economic crisis has accelerated expectations of an increased role in addressing economic and societal challenges while at the same time putting pressure on available finances Broader trends such as shifting student demographics and expectations globalisation and mobility and new ways of working with business have contributed to these increased pressures In the light of these trends there have been moves both from national or regional agencies and from individual institutions to respond by combining resources either through collaborative arrangements or more fundamentally through mergers between two or more universities After an introductory chapter by the editors which establishes the context for mergers and alliances the book falls into two main parts Part 1 takes a national or regional perspective to give some sense of the historical context the wider drivers and the importance of these developments in these cases Included are both systemic accounts for countries as France Sweden Romania Russia Wales and England and specific cross cutting initiatives including a major facility at Magurele in Romania and a Spanish programme for promoting international campuses of excellence Part 2 is built from specific cases of

universities either in mergers or alliances with examples from different countries such as France UK Romania Spain Germany Denmark Finland Switzerland A concluding chapter by the editors assesses these experiences and indicates the implications and future needs for understanding in this domain **Southern African Linguistics and Applied Language Studies** ,2009
