**Space and planning in secondary cities** Lochner Marais,Verna Nel,2019-09-01 Much of the urban research focuses on the large metropolitan areas in South Africa This book assesses spatial planning in the second tier cities of the country Secondary cities are vital as they perform essential regional and in some cases global economic roles and help to distribute the population of a country more evenly across its surface Apartheid planning left South African cities fragmented segregated and with low densities Post apartheid policies aim to reverse these realities by emphasising integration higher densities and upgrading Achieving these aims has been challenging and often the historical patterns continue The evidence shows that two opposing patterns prevail namely increased densities and continued urban sprawl This book presents ten case studies of spatial planning and spatial transformation in secondary cities of South Africa The book frames these case studies against complexity theory and suggests that the post apartheid response to apartheid planning represents a linear deviation from history The ten case studies then reveal how difficult it is for local decision makers to find appropriate responses and how current responses often result in contradictory results Often these cities are highly vulnerable and they find it difficult to plan in the context of uncertainty The book also highlights how these cities find it difficult to stand on their own against the influence of interest groups property developers mining companies traditional authorities other spheres of government The main reasons include weak municipal finance statements the dependence on national and provincial government for capital expenditure limited investment in infrastructure maintenance the lack of planning capacity the inability to implement plans and the unintended and sometimes contrary outcomes of post apartheid planning policies **Casebook of Indigenous**

*Genetic Afterlives* Noah Tamarkin, 2020-09-11 In 1997 M. E. R. Mathivha, an elder of the black Jewish Lemba people of South Africa, announced to the Lemba Cultural Association that a recent DNA study substantiated their ancestral connections to Jews. Lemba people subsequently leveraged their genetic test results to seek recognition from the post-apartheid government as indigenous Africans with rights to traditional leadership and land, retheorizing genetic ancestry in the process. In *Genetic Afterlives*, Noah Tamarkin illustrates how Lemba people give their own meanings to the results of DNA tests and employ them to manage competing claims of Jewish ethnic and religious identity, African indigeneity and South African citizenship. Tamarkin turns away from genetics researchers' results that defined a single story of Lemba people's true origins and toward Lemba understandings of their own genealogy as multivalent. Guided by Lemba people's negotiations of their belonging as diasporic Jews, South African citizens and indigenous Africans, Tamarkin considers new ways to think about belonging that can acknowledge the importance of historical and sacred ties to land without valorizing autochthony, borders or other technologies of exclusion.

*Career Adaptability, Employability and Resilience* Kobus Maree, 2017-12-05 This book examines how the career counselling profession should respond to the changes in the world of work that have resulted from the increasing need to communicate faster and disseminate information more efficiently. It emphasizes the twin aims of enhancing a person's career adaptability and helping them to become more employable rather than linearly trying to find a job and remaining in one organisation for their entire career lives. The book shows that to achieve these aims, people need to acquire career resilience, especially since the world of work no longer provides workers with work holding environments for the duration of their career lives. It takes into account historical analyses which show that whenever major technological change has occurred and widespread job losses have ensued, people have managed to use the new technology to create new employment opportunities. Readers from career psychology and management research, vocational and professional career coaching, and students of career psychology will find this book delivers sound, updated theory demonstrating how perceived threats in the 21st century can conceivably be turned into opportunities.
