inland policing is a symptom of the new demands and challenges facing the state in exercising authority in a fast moving interconnected world and its attempt to offer a semblance of order. Such challenges result in practice of random capricious informal and arbitrary operation of power which relies on non rational elements to solve policing problems. Through an ethnography of the worlds of police and immigration officers this book dissects the ethical political legal and social dilemmas and explores the tensions and contradictions of maintaining order in a deeply unequal globalized world. The new impetus to police migration is an insightful entry point to understand law enforcement in a global age.

The Changing Space Economy of City-Regions Koech Cheruiyot, 2017-10-30 This book addresses the South African Space Economy and its stark disparities and dualisms through an assessment of the Gauteng City Region the largest economic agglomeration in the country and on a continent bedevilled by a myriad of development challenges. The book's focus on understanding the overall character of Gauteng City Region's Space Economy through data mining analysis and mapping comprehensively supplements the Space Economy literature on the region. It covers the disparities exacerbated by an overlay of apartheid planning ideology and top down regional development based on selective encouragement of manufacturing investments in growth points or poles and how implementation of past policies intended to cure these disparities have yielded mixed results. This book further offers the Gauteng City Region as a microcosm of the national economy in the form of evident significant place based variations in the intensity and character of economic structure that on the one hand enjoys massive agglomeration economies while on the other has high levels of poverty and large numbers of people living below the Minimum Living Level. This book should appeal to urban studies specialists economists and development studies researchers in the Global South.
