Ethernet	Solid Green = Powered device connected to the associated port (includes devices with wake-on-LAN capability where a slight voltage is supplied to the Ethernet connection). Flickering Green = Activity seen from devices associated with the port. The flickering of the light is synchronized to actual data traffic. Off = The device is not powered, no cable or no powered devices connected to the associated ports.

This pattern continues until the broadband connection is successfully established. Flashing Red = No DSL signal on the line. This is only used when there is no signal, not during times of temporary 'no tone' during the training sequence. Off = The device is not powered.
