Waite, Darren A. Wheeler, 2020-02-28. Given the ubiquity of online technologies in the lives of high school and college students, universities are increasingly turning to social media for the purpose of organizational communication. This book shines a light on these practices in order to better understand how platforms such as Facebook, Twitter, Instagram and Snapchat are being used within the realm of student affairs. Each chapter will explore a different dimension of student affairs, e.g., admissions, career services, student health services, to provide an overview of key challenges and how new social media tools can be used to solve them. By providing examples that illustrate these evolving trends, this book is intended to help higher education professionals develop creative social media solutions that are appropriate for their own situations as they seek to strategically integrate social media into their student affairs efforts.

Religion and Education

Malini Sivasubramaniam,Ruth Hayhoe,2018-01-01 Despite the increased trend towards secularisation in state schooling issues of religion and spirituality have remained important Increased pluralism within societies through expanding migration patterns is changing the religious and cultural contours of many countries in Europe and North America and is creating a need for a deeper understanding of religious diversity However the lack of religious or spiritual education within the educational curriculum leaves a moral vacuum that can become a space to be exploited by religious extremism More recently religiously motivated incidences of terrorism in several parts of the world have heightened prejudicial attitudes and distrust of certain religions in particular These are profound concerns and there is an urgency to examine how religion religious education and interfaith initiatives can address such misconceptions This book is thus timely focusing on an area that is often neglected particularly on the role of religion in education for sustainable development While religious organisations and faith communities have had a long history of involvement in both schooling and social service delivery in many countries their role in reaching development goals has not always been explicitly recognised as is evident even in the United Nations most recently conceptualised 2030 Agenda for Sustainable Development Undeniably the integration of religious dialogue into mainstream development issues is crucial because deep cleavages resulting from the issue of minority religious rights continue to give cause for concern and conflict in many countries This edited book explores some of these tensions and issues and draws parallels across differing geographical contexts to help enhance our collective and comparative understanding of the role of religious education and institutions in advancing the post 2015 development agenda The contributors to this

volume each demonstrate that while religion in education can contribute to understanding and respect it is also a space that can be contested and co-opted. Without addressing the salience of religion however it will not be possible to foster peace and combat discrimination and prejudice. This book will be of interest to researchers, scholars and students in the field of comparative education and development, religious studies, theology and teacher development and training. This book may also be of interest to national and international policy makers. There are also numerous faith-based organisations as well as other non-governmental organisations (NGOs) working on religion and education issues that may find these case studies a useful resource.

International Schooling and Education in the 'New Era' Tristan Bunnell, 2019-03-06. This book looks to ask critical questions about the driving force behind the growth of International Education and international Schooling and offers an original demand supply framework for understanding this expansion.

Decolonisation after Democracy Laurence Piper, 2020-05-21. Decolonisation after Democracy addresses the provocative idea that we need to rid higher education of lingering forms of colonial knowledge. This matters because in the colonial era much knowledge was put to the service of subjugating indigenous peoples and the assumptions from this era may linger into the present. Examples of deep-rooted and foundational forms of knowledge that carry colonial traits are normative binaries such as civilised and backward, modern and traditional, and rational and superstitious. In addition, some accounts of positive values like freedom, equality, justice and democracy may hide the assumption that the western experience is the norm from which other kinds are rendered imitations, deviations or pathologies. In this collection, some of South Africa's leading political scientists and academics engage with the challenge of decolonising knowledge in the research and teaching of politics. It includes new insights about the state, international relations, clientelism, state-society relations and land reform and introduces new ways to engage the colonial library, curriculum reform and the marginality of historically black institutions. Finally, the contributors deal with the decolonial challenge posed by the FeesMustFall student movements reflecting on issues of revolutionary politics and gender and sexual violence. This book was originally published as a special issue of *Politikon*.
