Desmond E. Moser, Fernando Corfu, James R. Darling, Steven M. Reddy, Kimberly Tait, 2017-12-26 Microstructural Geochronology Geochronology techniques enable the study of geological evolution and environmental change over time This volume integrates two aspects of geochronology one based on classical methods of orientation and spatial patterns and the other on ratios of radioactive isotopes and their decay products The chapters illustrate how material science techniques are taking this field to the atomic scale enabling us to image the chemical and structural record of mineral lattice growth and deformation and sometimes the patterns of radioactive parent and daughter atoms themselves to generate a microstructural geochronology from some of the most resilient materials in the solar system First compilation of research focusing on the crystal structure material properties and chemical zoning of the geochronology mineral archive down to nanoscale Novel comparisons of mineral time archives from different rocky planets and asteroids and their shock metamorphic histories Fundamentals on how to reconstruct and date radiogenic isotope distributions using atom probe tomography Microstructural Geochronology will be a valuable resource for graduate students academics and researchers in the fields of petrology geochronology mineralogy geochemistry planetary geology astrobiology chemistry and material science It will also appeal to philosophers and historians of science from other disciplines Afrotropical Streams and Rivers Tatenda Dalu, Frank Masese, 2024-11-09 The Afrotropical Streams and Rivers Structure Ecological Processes and Management is a comprehensive guide that provides assessment of major rivers and tributaries in Africa Unlike other books available the editors present a thorough study of geomorphological hydrological biological and ecological processes incorporating a range of plant and animal communities while considering implications of human communities that depend upon them This book edited by a diverse cohort of researchers and or scholars is intended as an educational and practical guide for graduate students researchers and scientists who focus on the biodiversity conservation and management policy issues of the African river systems Provides a comprehensive introduction to African freshwater rivers their biota and abiotic processes Contains unique case studies on African streams and rivers Organised around an interdisciplinary approach that covers the complex aspects of conservation and management of African river systems on the continent Novel Materials for Environmental Remediation Applications Dimitrios A Giannakoudakis, Lucas Meili, Ioannis Anastopoulos, 2022-10-01 Novel Materials for Environmental Remediation Applications Adsorption and Beyond presents detailed comprehensive coverage of novel and advanced materials that can be applied to address the growing global concern of the pollution of natural resources in water the air and in soil The book provides up to date knowledge of state of the art materials and treatment processes as well as details of applications including adsorptive remediation and catalytic remediation Chapters include the characteristics of materials basic and important physicochemical features for environmental remediation applications routes of synthesis

recent advances as remediation medias and future perspectives This book offers an interdisciplinary and practical examination of novel materials and processes for environmental remediation that will be valuable to environmental scientists materials scientists environmental chemists and environmental engineers alike Highlights a wide range of synthetic methodologies physicochemical and engineered features of novel materials and composites hybrids for environmental purposes Presents applications of adsorbents or catalysts for water wastewater treatment and air purification technologies such as advanced oxidation processes adsorption photocatalysis coagulation flotation membrane separation filtration and others Provides comprehensive consolidated coverage of novel materials for environmental remediation applications for researchers in environmental science materials science and industry to identify in depth solutions to pollution Routledge Handbook of Food as a Commons Jose Luis Vivero-Pol,Tomaso Ferrando,Olivier De Schutter,Ugo Mattei,2018-12-17 From the scientific and industrial revolution to the present day food an essential element of life has been progressively transformed into a private transnational mono dimensional commodity of mass consumption for a global market But over the last decade there has been an increased recognition that this can be challenged and reconceptualized if food is regarded and enacted as a commons This Handbook provides the first comprehensive review and synthesis of knowledge and new thinking on how food and food systems can be thought interpreted and practiced around the old new paradigms of commons and commoning The overall aim is to investigate the multiple constraints that occur within and sustain the dominant food and nutrition regime and to explore how it can change when different elements of the current food systems are explored and re imagined from a commons perspective Chapters do not define the notion of commons but engage with different schools of thought the economic approach based on rivalry and excludability the political approach recognizing the plurality of social constructions and incorporating epistemologies from the South the legal approach that describes three types of proprietary regimes private public and collective and different layers of entitlement bundles of rights and the radical activist approach that considers the commons as the most subversive coherent and history rooted alternative to the dominant neoliberal narrative These schools have different and rather diverging epistemologies vocabularies ideological stances and policy proposals to deal with the construction of food systems their governance the distributive implications and the socio ecological impact on Nature and Society The book sparks the debate on food as a commons between and within disciplines with particular attention to spaces of resistance food sovereignty de growth open knowledge transition town occupations bottom up social innovations and organizational scales local food national policies South South collaborations international governance and multi national agreements Overall it shows the consequences of a shift to the alternative paradigm of food as a commons in terms of food the planet and living beings Non-Western Identity Byron G. Adams,Fons J. R. van de Vijver,2022-02-02 Identity is a construct strongly rooted and still predominantly studied in Western or WEIRD Western educated industrialized rich and democratic contexts e g North American and Western European Only recently has there been more of a conscious effort to

study identity in non Western or non WEIRD contexts This edited volume investigates identity from primarily a non Western perspective by studying non Western contexts and non Western minority or immigrant groups living in Western contexts The contributions a examine different aspects of identity e g personal identity social identity online identity as either independent or interrelated constructs b consider the associations of these constructs with aspects of intergroup relations acculturative processes and or psychological well being c document the advancement in research on identity in underrepresented groups contexts and regions such as Africa Asia Eastern Europe the Middle East and South America and d evaluate different approaches to the study of identity and the implications thereof This book is intended for cultural or cross cultural academics practitioners educators social workers postgraduate students undergraduate students and scholars interested in studying identity It provides insight into how identity in non Western groups and contexts may both be informed by and may inform Western theoretical perspectives Sociology in South Africa R. Sooryamoorthy,2016-08-13 This book is the first comprehensive account of the history and current state of South African sociology Providing a holistic picture of the subject both as it is taught in universities and as a field of research it reveals the trajectories of a discipline in a challenging socio political context With the support of historical and scientometric data it demonstrates how the changing political situation from colonialism to apartheid to democracy has influenced the nature direction and foci of sociological research in the country The author shows how during the apartheid era sociology was professionally fragmented and divided along language and race lines It was however able to flourish with the advent of democracy in 1994 and has become a unique academic movement This insightful work will appeal to students and scholars of the social sciences and all those interested in the history and society of South Africa **Modern Trends in Diatom Identification** Gabriel Cristóbal,Saúl Blanco,Gloria Bueno,2020-05-28 High resolution images of phytoplankton cells such as diatoms or desmids which are useful for monitoring water quality can now be provided by digital microscopes facilitating the automated analysis and identification of specimens Conventional approaches are based on optical microscopy however manual image analysis is impractical due to the huge diversity of this group of microalgae and its great morphological plasticity As such there is a need for automated recognition techniques for diagnostic tools e g environmental monitoring networks early warning systems to improve the management of water resources and decision making processes Describing the entire workflow of a bioindicator system from capture analysis and identification to the determination of quality indices this book provides insights into the current state of the art in automatic identification systems in microscopy **Digital Technologies and the Evolving African Newsroom** Hayes Mabweazara,2016-04-14 African newsrooms are experiencing the disruptive impact of new digital technologies on the way they generate and disseminate news Indeed newsrooms are being forced to adapt in various ways and there are clear dimensions of localized creativity and adaptations by journalists to the digital revolution In the same way the influences of digitization Internet and social media are changing the informational needs of readers including how they engage with news

These developments nonetheless remain on the margins of mainstream journalism research very few researchers have sought to qualitatively capture the implications of developments in digital technologies on the routine practices of African journalists especially in their natural habitat the newsroom In this light this edited volume interrogates the changing ecology of newsmaking in Africa in the context of rapid technological changes in newsrooms as well as in the wider social context of news production It brings together six contributions drawn from five countries Egypt Mozambique South Africa Nigeria and Zimbabwe to explore practices challenges and professional normative dilemmas emerging with the adoption and appropriation of new technologies While the studies point to dimensions of localised new technology appropriations as defined by the complex socio political structures in which African journalists operate they are not rigidly confined to Africa They are expressly in dialogue with theoretical observations largely emerging from Western scholarship In this sense the book goes beyond simply mainstreaming African perspectives it engages directly with dominant theoretical observations and offers a point of departure for developing what could loosely be branded as an African digital journalism epistemology This book was originally published as a special issue of Digital Journalism

This book provides a comprehensive overview of the evolution of one of the oldest and best exposed Archaean cratons on this planet There is currently a renewed interest in the early Earth and the Kaapvaal craton has long served as a model for early crustal evolution This unique multidisciplinary resource features information on geology tectonics geochemistry and geochronology It offers a wealth of new data on various aspects of the craton as well as contributions on the various crustal units by international specialists

Deanship in the Global South Oliver J.J. Seale,2021-02-08 The university today is a

postmodern neo liberal competitive boundary less knowledge conglomerate a far cry from its historical traditional classical and collegial roots There is a body of literature on deanship that points to its evolving nature in the contemporary academe characterised by complexity and change Balancing academic demands simultaneously with the requirements for effective performance leadership and management lies at the heart of this very challenging bridging role nowadays Deans are generally former academics emerging from a traditional collegial space and often catapulted into the relatively unknown domain of executive management with its related problems Deans nowadays are required to be more than collegial intellectual leaders They are also meant to be fiscal and human resource experts fundraisers politicians and diplomats Deanship in the Global South Bridging Troubled Waters is about the deans lived reality as they try to balance the demands of both the academe from which they emerge and the administration to whom they now need to account Their lack of preparation and inadequate support points to the need for a more strategic integrated approach to leadership development within their critical bridging roles between the academe and administration

Trade Unions and the Age of Information and Communication Technologies in Kenya Eric E. Otenyo, 2017-03-01 Trade Unions and the Age of Information and Communication Technologies in Kenya provides a comprehensive description of the use of ICTs within the trade union movement in Kenya In this book Professor Eric Otenyo explores the intersection between new technologies and union as key stakeholders in national governance and development The dearth of research on how trade unions can play a part in the new economy continues to undermine the effective use of ICTs in development This book brings to light the challenges that unions face while navigating the new economy and netstate characterized by a proliferation of ICTs and globalization

Students Must Rise Ann Heffernan, Noor Nieftagodien, Sifiso Mxolisi Ndlovu, Bhekizizwe Peterson, 2016-06-01 A detailed account of the incredibly influential Soweto Student Uprising of 1976 The Soweto Student Uprising of 1976 was a decisive moment in the struggle against apartheid It marked the expansion of political activism to a new generation of young activists but beyond that it inscribed the role that young people of subsequent generations could play in their country s future Since that momentous time students have held a special place in the collective imaginary of South African history Drawing on research and writing by leading scholars and prominent activists *Students Must Rise* takes Soweto 76 as its pivot point but looks at student and youth activism in South Africa more broadly by considering what happened before and beyond the Soweto moment Early chapters assess the impact of the anti pass campaigns of the 1950s of political ideologies like black

consciousness as well as of religion and culture in fostering political consciousness and organisation among youth and students in townships and rural areas Later chapters explore the wide reaching impact of June 16th itself for student organisation over the next two decades across the country Two final chapters consider contemporary student based political movements including RhodesMustFall and FeesMustFall and historically root these in the long and rich tradition of student activism in South Africa 2016 marks the 40th anniversary of the 1976 June 16th uprisings This book rethinks the conventional narrative of youth and student activism in South Africa by placing that most famous of moments the 1976 students uprising in Soweto in a deeper historical and geographic context

Urban Mobility in a Global Perspective

Oliver Schwedes,2017 For the first time in human history the majority of the world s population is now no longer living in rural areas but in cities Whereas in the industrialised countries urban and transport development has now reached a certain degree of saturation it is proceeding in other regions of the world with an enormous dynamism The primary concern of this study is to present for the first time a survey of global urban and transport development in order to gain an overview of the magnitude of the global challenges Against this background the study concludes by proposing a direction for future deliberations in the name of determining an adequate response to the looming problems Oliver Schwedes has the professorship in Integrated Transport Planning at the Technische Universit t Berlin in Germany His research areas include urban and transport policy and planning Ebook Download

The Rhodesian War Paul L. Moorcraft,Peter

McLaughlin,2016-01-20 A political and military analysis of this conflict in southern Africa with maps photos and a new introduction assessing its long aftermath A half century after the Universal Declaration of Independence this superb book depicts the military history of Southern Rhodesia from the first resistance to colonial rule through the period of UDI by the Smith government to the Lancaster House agreement that transferred power There are vivid accounts of the operations against the black nationalist guerillas by the security forces and the intensity of the fighting and courage of the participants will surprise and enthrall readers Atrocities were undoubtedly committed by both sides as the protagonists played for very high stakes But this is more than just a book on military operations The authors are able to provide expert analysis of the historical situation and examine events well into the twenty first century including Mugabe s operations against rival tribes and white farmers With a new introduction this is essential reading for those wishing to learn more about a counterinsurgency campaign and why despite the ingenuity of the Rhodesian military fighting against overwhelming odds and restricted by sanctions the outcome culminating in the Lancaster House Agreement was inevitable

Earth's Oldest

Rocks Martin J. Van Kranendonk,Vickie Bennett,Elis Hoffmann,2018-09-26 Earth s Oldest Rocks Second Edition is the only single reference source for geological research of early Earth This new edition is an up to date collection of scientific articles on all aspects of the early history of the Earth from planetary accretion at 4 567 billion years ago Ga to the onset of modern style plate tectonics at 3 2 Ga Since the first edition was published significant new advances have been made in our

understanding of events and processes on early Earth that correspond with new advances in technology The book includes contributions from over 100 authors all of whom are experts in their respective fields The research in this reference concentrates on what is directly gleaned from the existing rock record to understand how our planet formed and evolved during the planetary accretion phase formation of the first crust the changing dynamics of the mantle and style of tectonics life's foothold and early development and mineral deposits It is an ideal resource for academics students and the general public alike Advances in early Earth research since 2007 based primarily on evidence gleaned directly from the rock record More than 50% of the chapters in this edition are new and the rest of the chapters are revised from the first edition with more than 700 pages of new material Comprehensive reviews of areas of ancient lithosphere from all over the world and of crust forming processes New chapters on early solar system materials composition of the ancient atmosphere hydrosphere and overviews of the oldest evidence of life on Earth and modeling of early Earth tectonics *The Archaeology of Southern*

Africa Peter Mitchell, 2024-06-06 Some of humanity's earliest ancestors lived in southern Africa and evidence from sites there has inspired key debates on human origins and the emergence of complex cognition Building on its rich rock art heritage archaeologists have developed theoretical work that continues to influence rock art studies worldwide with the relationship between archaeological and anthropological data central to understanding past hunter gatherer pastoralist and farmer communities alike New work on pre colonial states contests models that previously explained their emergence via external trade while the transformations wrought by European colonialism are being rewritten to emphasise Indigenous agency feeding into efforts to decolonise the discipline itself Inhabited by humans longer than almost anywhere else and with an unusually varied complex past southern Africa thus has much to contribute to archaeology worldwide In this revised and updated edition Peter Mitchell provides a comprehensive and extensively illustrated synthesis of its archaeology over more than three million years Implementing Environmental Constitutionalism Erin Daly, James R. May, 2018-11-08

Constitutions can play a central role in responding to environmental challenges such as pollution biodiversity loss lack of drinking water and climate change The vast majority of people on earth live under constitutional systems that protect the environment or recognize environmental rights Such environmental constitutionalism however falls short without effective implementation by policymakers advocates and jurists Implementing Environmental Constitutionalism Current Global Challenges explains and explores this implementation gap This collection is both broad and deep While some of the essays analyze crosscutting themes such as climate change and the need for rule of law that affect the implementation of environmental constitutionalism throughout the world others delve deeply into geographically contextual experiences for lessons about how constitutional environmental law might be more effectively implemented This volume informs global conversations about whether and how environmental constitutionalism can be made more effective to protect the natural environment
