Coming to Our Senses positions affect or feeling as our new cultural compass ordering the parameters and possibilities of what can be known From Facebook likes to Coca Cola loves from emotional intelligence in business to emotional contagion in social media affect has displaced reason as the primary catalyst of global culture Through examples of feeling in the books film music advertising cultural criticism and political discourse of the United States and Latin America Reber shows how affect encourages the public to reason on the strength of sentiment alone Well being represented by happiness and health and ill being embodied by unhappiness and disease form the two poles of our social judgment whether in affirmation or critique We must then reenvision contemporary politics as operating at the level of the feeling body so we can better understand the physiological and epistemological conditions affirming our cultural status quo and contestatory strategies for emancipation
