

The background of the book cover is a high-magnification, false-color micrograph of a semiconductor die. The die is rectangular and densely packed with intricate circuit patterns. Various regions are highlighted in different colors: bright green, red, blue, and purple, likely representing different materials or functional blocks. A network of fine, dark lines crisscrosses the surface, representing the interconnects or metal layers of the chip. The overall appearance is that of a complex, miniature electronic circuit.
