Civilizing the Enemy Patrick Thaddeus Jackson,2009-06-25 For the past century politicians have claimed that Western Civilization epitomizes democratic values and international stability But who is a member of Western Civilization Germany for example was a sworn enemy of the United States and much of Western Europe in the first part of the twentieth century but emerged as a staunch Western ally after World War II By examining German reconstruction

under the Marshall Plan author Patrick Jackson shows how the rhetorical invention of a West that included Germany was critical to the emergence of the postwar world order *Civilizing the Enemy* convincingly describes how concepts are strategically shaped and given weight in modern international relations by expertly dissecting the history of the West and demonstrating its puzzling persistence in the face of contradictory realities By revisiting the early Cold War by means of some carefully conducted intellectual history Patrick Jackson expertly dissects the post 1945 meanings of the West for Europe's emergent political imaginary West German reconstruction the foundation of NATO and the idealizing of Western civilization all appear in fascinating new light Geoff Eley University of Michigan Western civilization is not given but politically made In this theoretically sophisticated and politically nuanced book Patrick Jackson argues that Germany's reintegration into a Western community of nations was greatly facilitated by civilizational discourse It established a compelling political logic that guided the victorious Allies in their occupation policy This book is very topical as it engages critically very different and less successful contemporary theoretical constructions and political deployments of civilizational discourse Peter J Katzenstein Cornell University What sets Patrick Jackson's book apart is his attention on the one hand to philosophical issues behind the kinds of theoretical claims he makes and on the other hand to the methodological implications that follow from those claims Few scholars are willing and able to do both and even fewer are as successful as he is in carrying it off Patrick Jackson is a systematic thinker in a field where theory is all the rage but systematic thinking is in short supply Nicholas Onuf Florida International University Patrick Thaddeus Jackson is Assistant Professor of International Relations in American University's School of International Service

Punk Productions Stacy Thompson, 2012-02-01 Stacy Thompson's Punk Productions offers a concise history of punk music and combines concepts from Marxism to psychoanalysis to identify the shared desires that punk expresses through its material productions and social relations Thompson explores all of the major punk scenes in detail from the early days in New York and England through California Hardcore and the Riot Grrrls and

thoroughly examines punk record collecting the history of the Dischord and Lookout record labels and zines produced to chronicle the various scenes over the years While most analyses of punk address it in terms of style Thompson grounds its aesthetics and particularly its most combative elements in a materialist theory of punk economics situated within the broader fields of the music industry the commodity form and contemporary capitalism While punk s ultimate goal of abolishing capitalism has not been met the punk enterprise that stands opposed to the music industry is still flourishing Punks continue to create aesthetics that cannot be readily commodified or rendered profitable by major record labels and punks remain committed to transforming consumers into producers in opposition to the global economy s increasingly rapid shift toward oligopoly and monopoly

Beyond Civilization Harry Redner, 2013-01-31 For Harry Redner the phrase beyond civilization refers to the new and unprecedented condition the world is now entering specifically the condition commonly known as globalization Redner approaches globalization from the perspective of history and seeks to interpret it in relation to previous key stages of human development His account begins with the Axial Age 700 300 BC and proceeds through Modernity after AD 1500 to the present global condition What is globalization doing to civilization In answering this question Redner studies the role played by capitalism the state science and technology He aims to show that they have had a catalytic impact on civilization through their reductive effect on society culture and individualism However Redner is not content to diagnose the ills of civilization he also suggests how they might be ameliorated by cultural conservation Above all it is to the problem of decline in the higher forms of literacy that he addresses himself for it is on the culture of the book that previous civilizations were founded This study will be of interest to sociologists historians and social and political theorists Its style makes it accessible also to general readers interested in civilization past present and future
